EPICVUE™

Sophisticated without being stuffy, unadorned without being plain, EpicVue is built on a philosophy of grand simplicity. Size, while impressive, is but a small aspect of this striking line. Rather, it is through sleek profiles, bold lines and uninterrupted expanses of glass that these seemingly impossible windows are brought to life.

A photograph of a modern building interior. The ceiling is made of horizontal wooden planks. Large windows with wooden frames offer a view of the outdoors, showing trees and a cloudy sky. A wooden railing is visible in the foreground. A white rectangular box containing text is positioned on the right side of the image.

We shape our buildings;
thereafter they shape us.

Winston Churchill

Construct

UNPARALLELED

When a design concept is both modern and timeless, its construction should be as well. The EpicVue™ collection uses state-of-the-art construction techniques and materials including a thick, extruded sash and frame to ensure that its unrivaled beauty will be enjoyed for years to come. Ease of operation, craftsmanship and strength go without saying.

SLEEK, SQUARED, SLIM

Contemporary style is evident in details including 90° edging profiles, glazing and simulated divided lites. No extraneous lines, angles or steps to distract from the simplicity.

EXTRUDED ALUMINUM CLAD-WOOD SASH

Epic views call for epic support and this is one place where minimalism is not welcome. An extruded aluminum sash provides tremendous strength and rigidity to stand up to the elements.

OPTION RICH

EpicVue offers multiple wood species from which to choose, 42 standard colors and even custom colors to match your home. The result is individuality, never complexity.

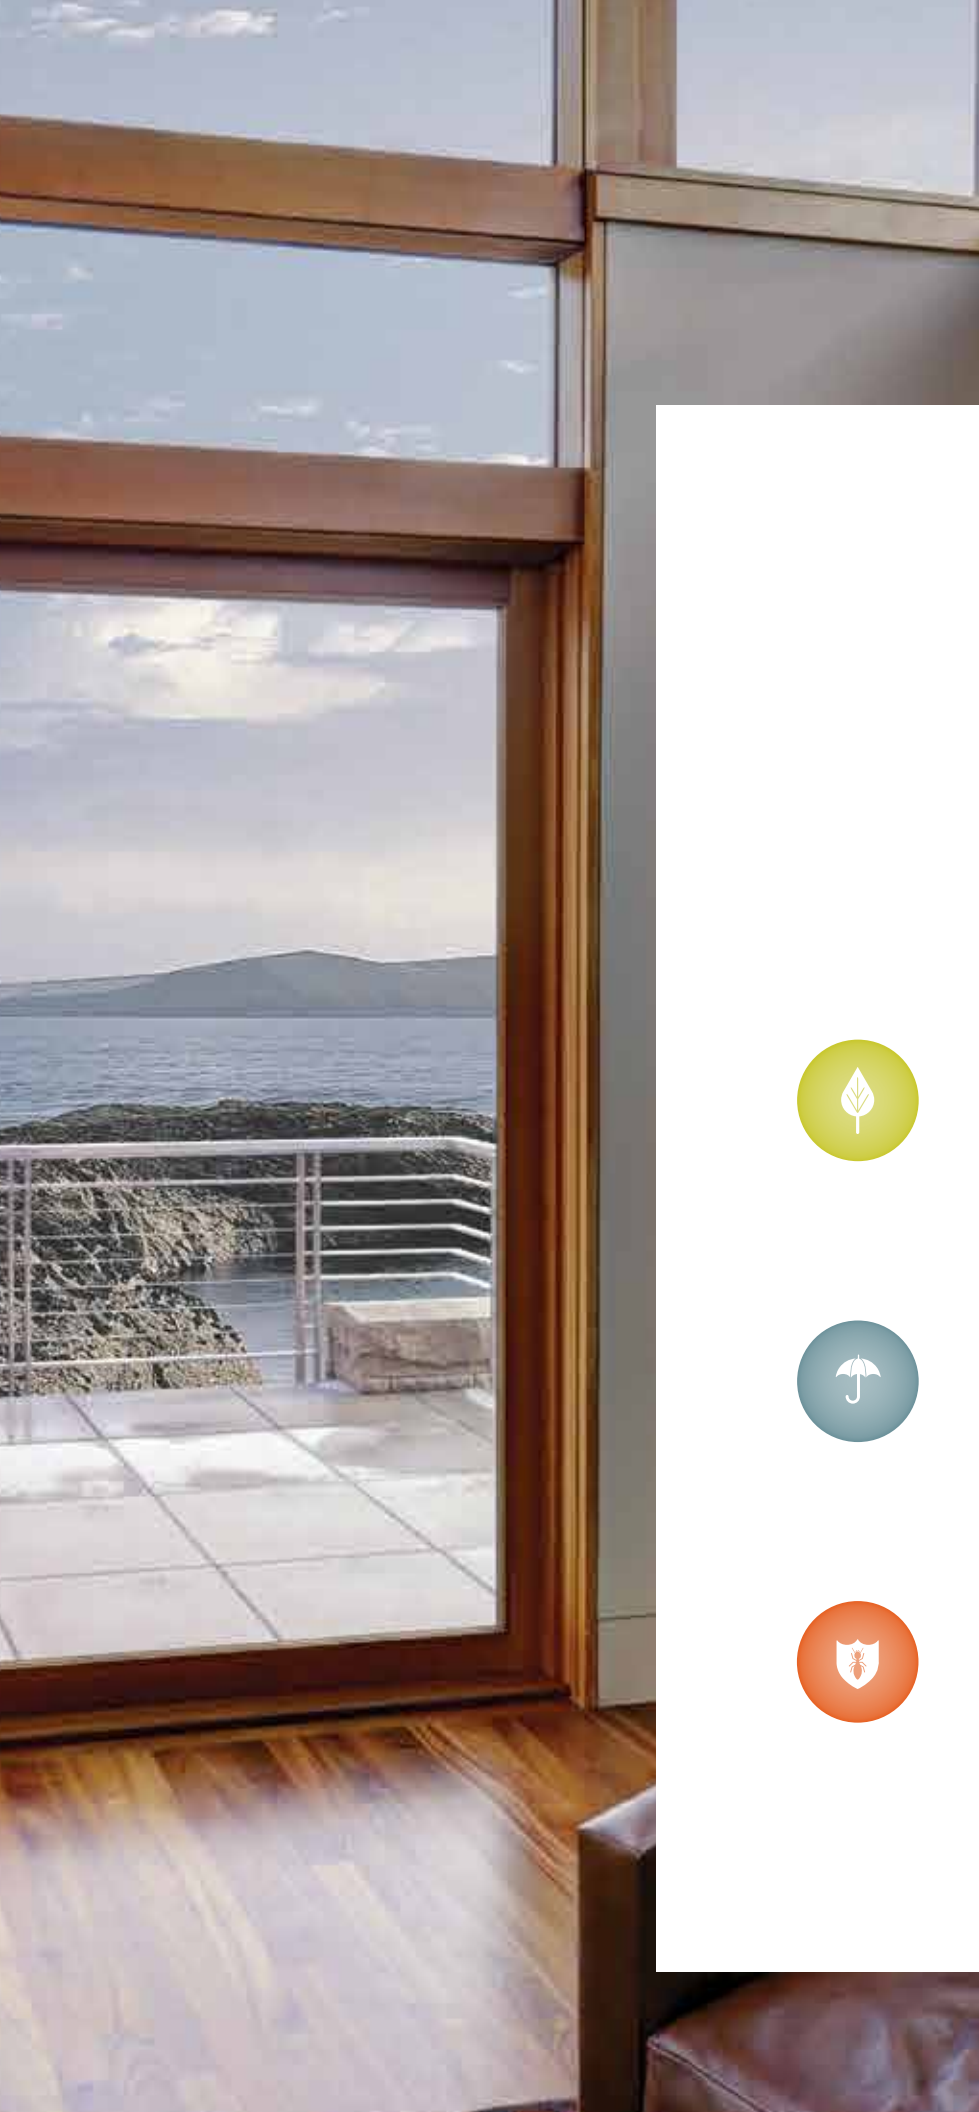

SURFACE DETAIL

The goal here is to stand out by stepping aside. Smooth surfaces allow the view to take over, bringing the glass as far to the edge as possible. No unnecessary steps or textures get in the way.

AuraLast® pine is a patented wood product that provides protection against wood rot, water damage and termites. This water-based process fortifies wood all the way to the core, providing an exclusive level of protection you'll only find through JELD-WEN.

EASY ON THE ENVIRONMENT

Water-based treatment releases up to 96% fewer volatile organic compounds (VOCs) during the manufacturing process than traditional solvent-based methods.

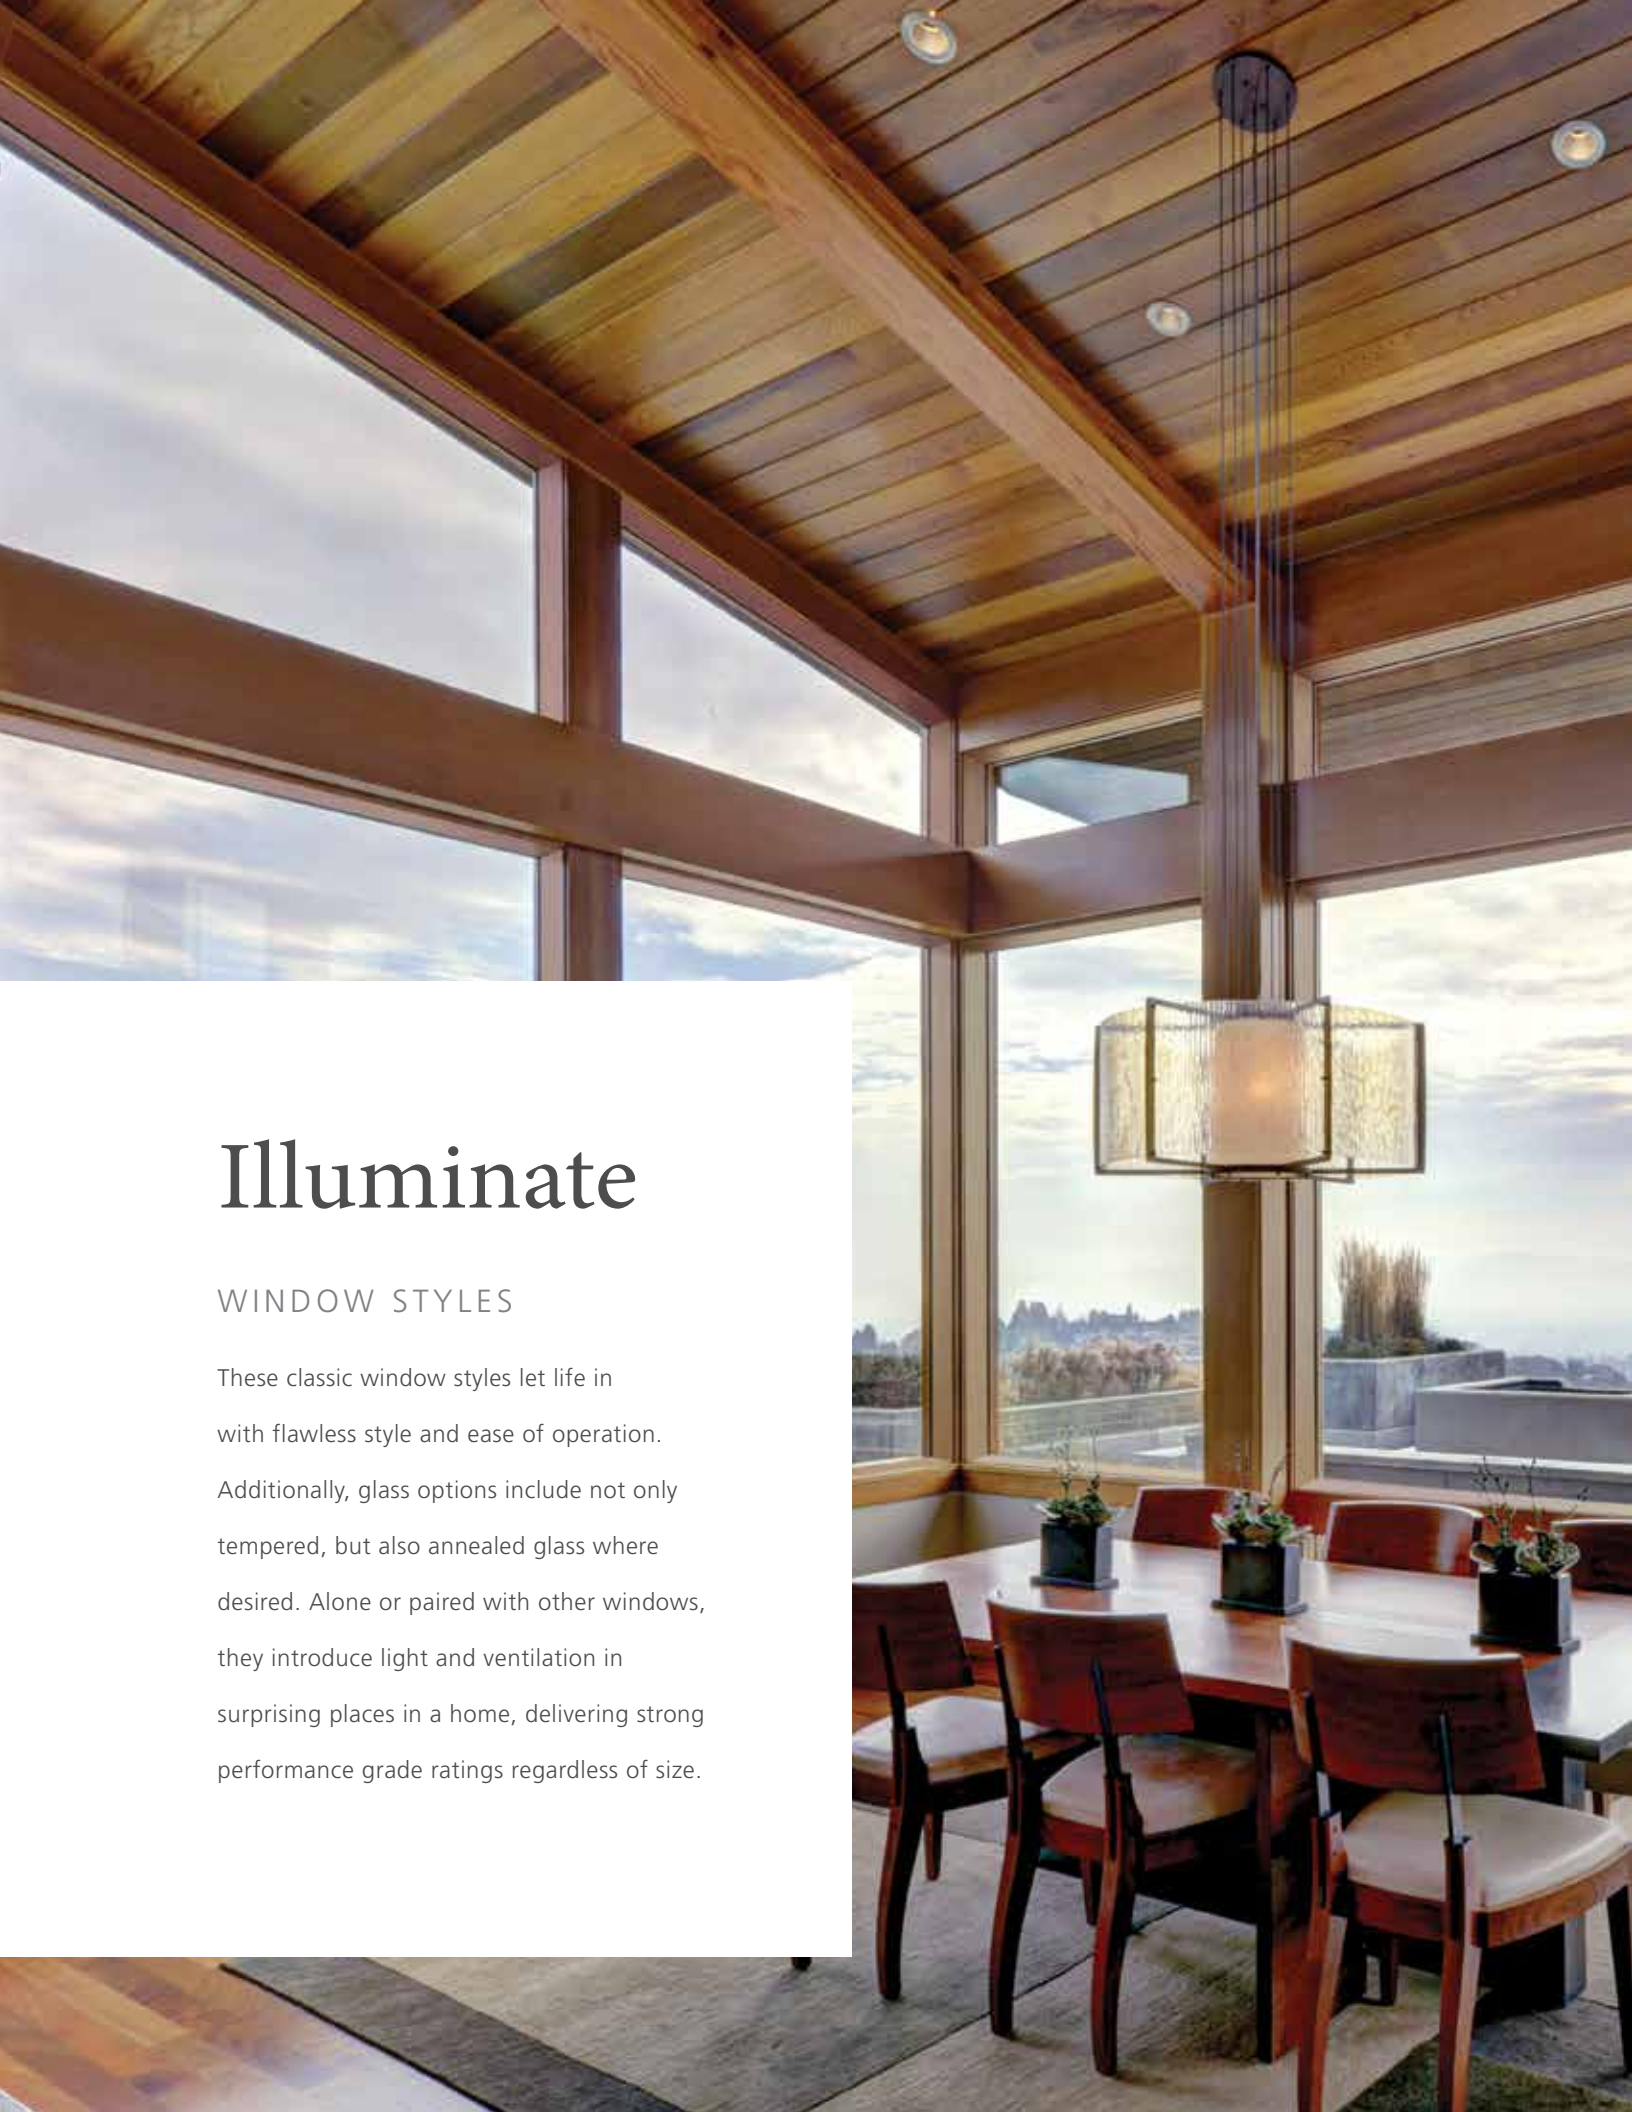

WET WEATHER PROTECTION

Whatever the climate, AuraLast® protects against water damage and rot like no other. Whether it's humidity, storms or dampness, AuraLast® pine stands up to the rigors of wet weather.

TERMITE PROTECTION

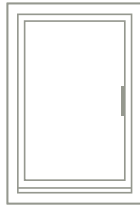

Termites can be devastating to windows and doors, but not to those built with AuraLast® pine. It safely and effectively repels termites, preserving the beauty of your investment.

Illuminate

WINDOW STYLES

These classic window styles let life in with flawless style and ease of operation. Additionally, glass options include not only tempered, but also annealed glass where desired. Alone or paired with other windows, they introduce light and ventilation in surprising places in a home, delivering strong performance grade ratings regardless of size.

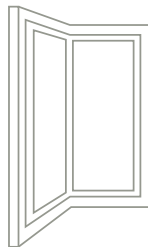

CASEMENT

Hinged at the side, this window opens up design options for many rooms in the home.

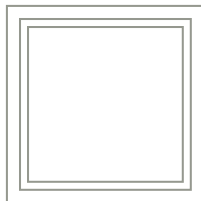

AWNING

This versatile style is hinged at the top to open out from the bottom in an upward swing.

DIRECT-SET, CORNER

Minimal frames make it possible for glass to extend farther, even with corner windows

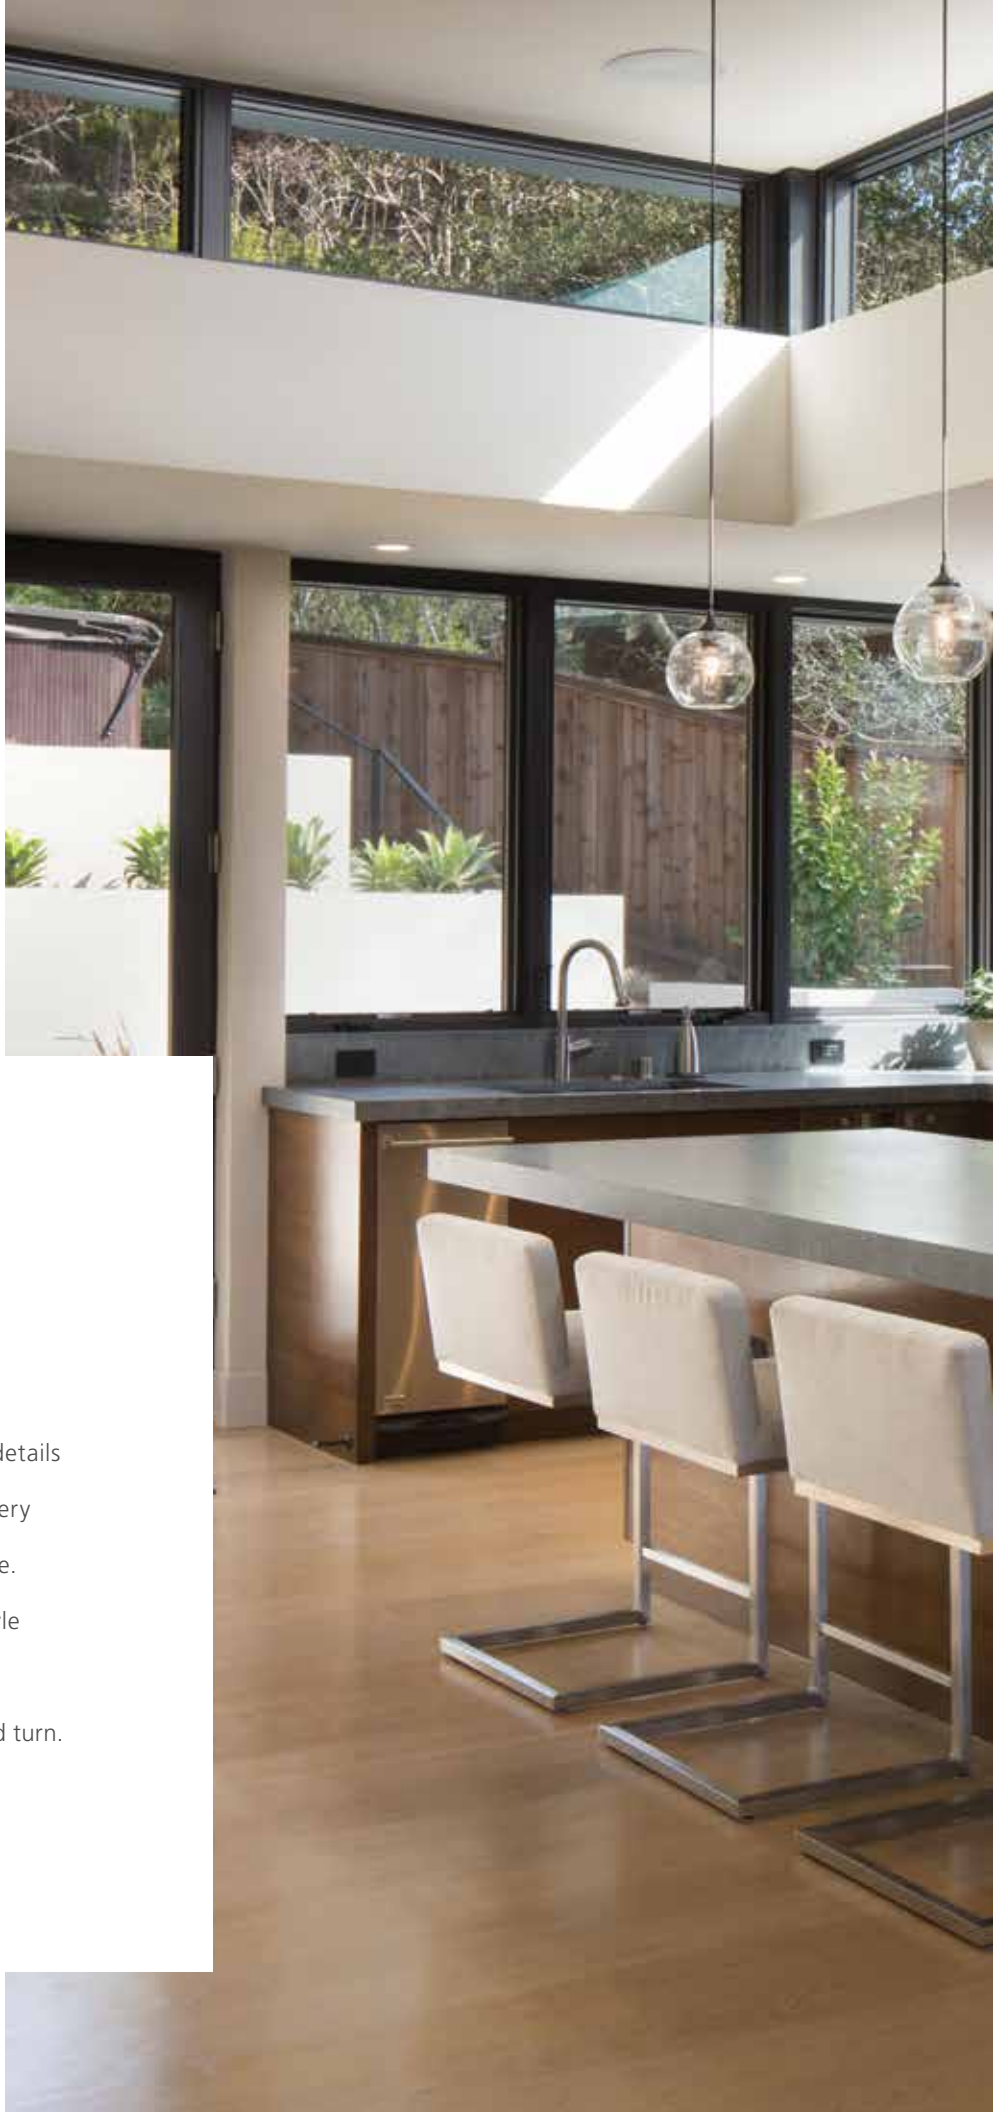

GEOMETRIC, FIXED

Do not adjust your display. The wide-open views you see with these windows are real.

Archetype

MODERN PRECISION

The look takes your breath away. The details help give it back, with innovation in every slim line; advancements in every feature. To us, contemporary means putting style and substance on a level playing field, inspiring awe with every look, touch and turn.

CASEMENT WINDOW

GLAZING STOP

A low-profile, square glazing stop enables glass to extend all the way to the edge of the frame. The unfettered millwork allows views to take center stage.

EXTENSION JAMB

This component creates a seamless transition between window and interior, offering more wood and less mechanics. The goal is to have a standout home, not just windows that stand out.

SQUARE CORNER UNIT

With profiles, glazing and trim pieces that are unobtrusive, the glass seems to float and wrap around the corner to let in light and scenery. Structural mull can be as little as one-quarter inch.

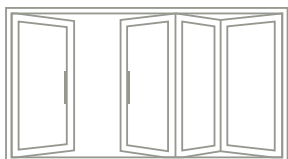

Visionary

DIRECT-SET WINDOW

This minimalistic window maximizes views so there's not a bad seat in the house. Modern in every sense of the word, this light source turns corners, opening up angles and rooms alike to the beauty outside.

FOLDING WALL SYSTEM

This innovative system opens wide to welcome the outdoors inside. Easy to operate and built to last, it creates space like no other.

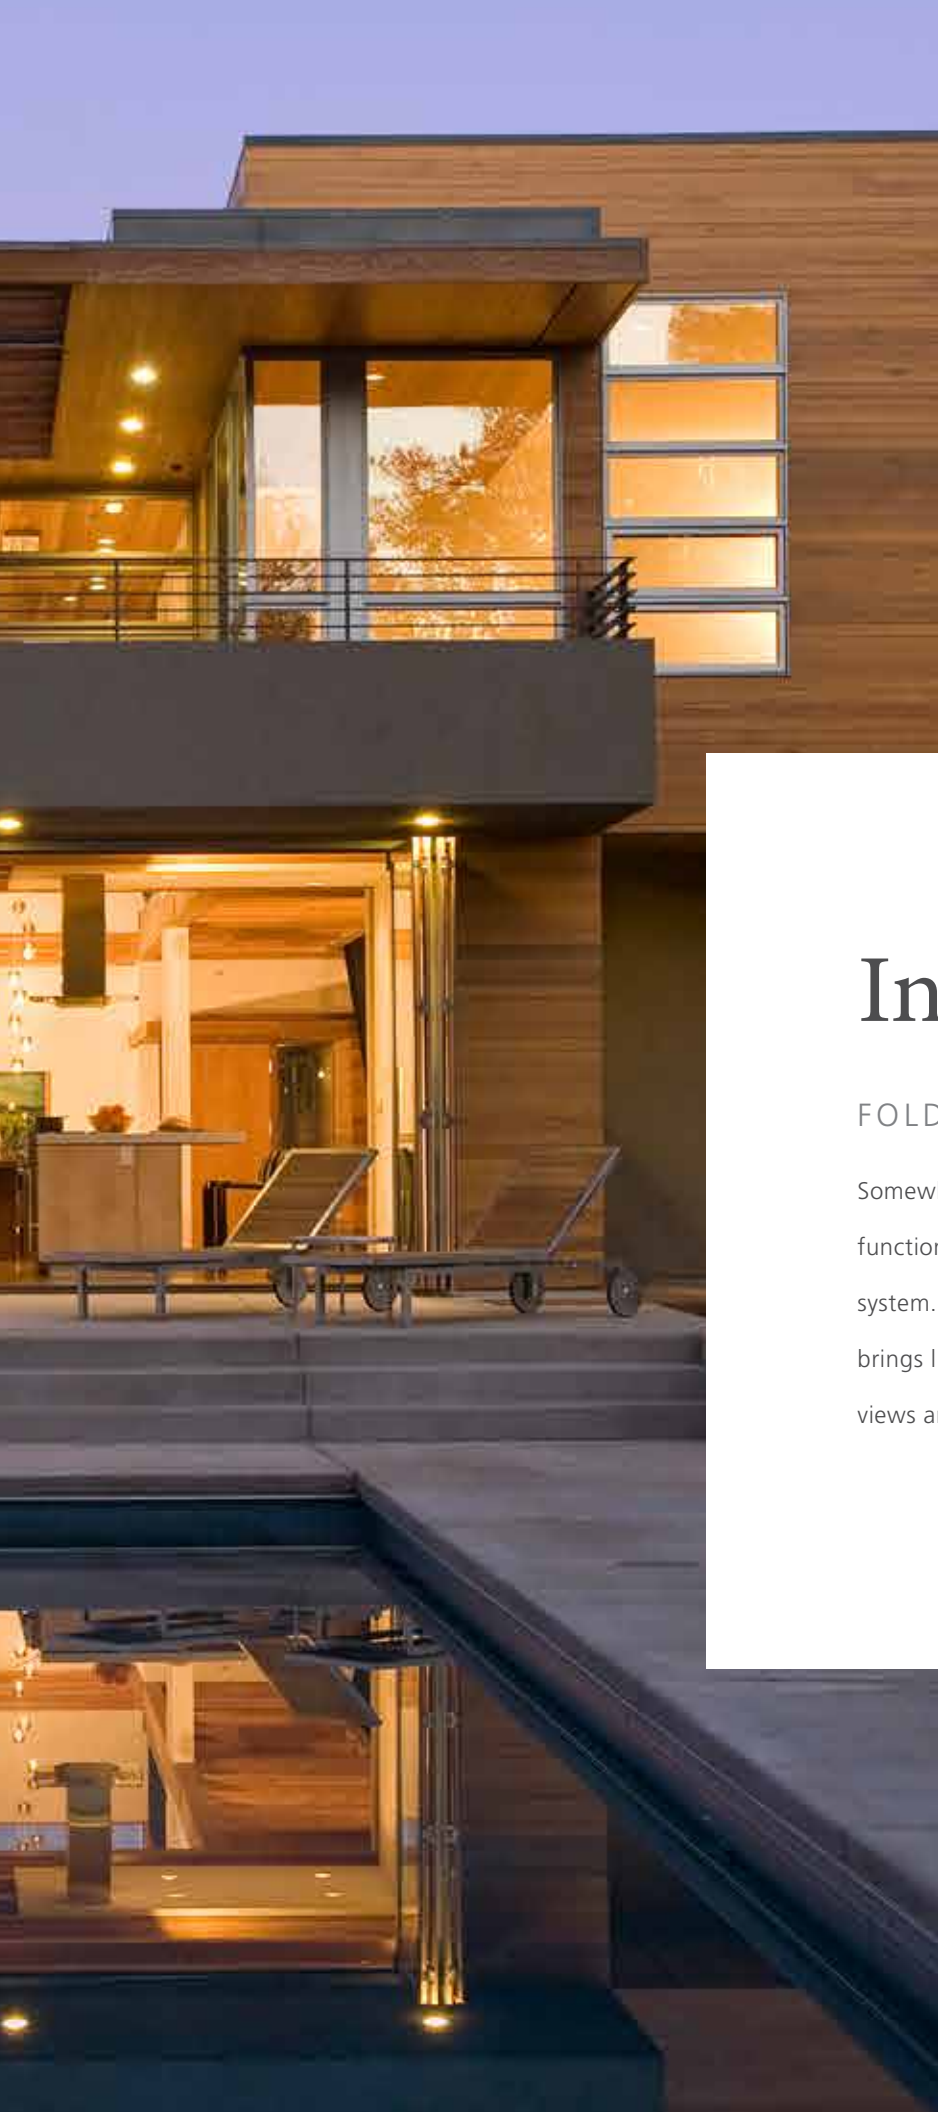

DESIGNED TO LAST

Heavy-duty aluminum stands up to weather, foot traffic and countless openings and closings.

TRACKING

Folding wall system doors open and close gracefully with tracking at the head. Ball bearings provide smooth operation.

Invitation

FOLDING WALL SYSTEM

Somewhere between performance art and functional origami lies this one-of-a-kind system. Open, closed, or in transition, it brings life into a home with spectacular views and wide-open versatility.

Limitless

GLIDING PATIO DOORS

Impossibly large views made possible by innovative design. Enjoy the seamless combination of nature and civilization, brought together through a design philosophy that is firmly rooted in both.

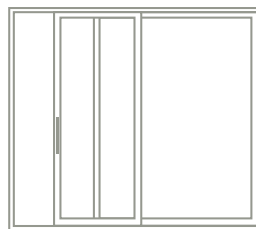

GLIDING DOOR TRACK

Brilliantly engineered, the smoothly operating gliding door track allows you to move large panels of glass almost effortlessly.

GLIDING PATIO DOOR

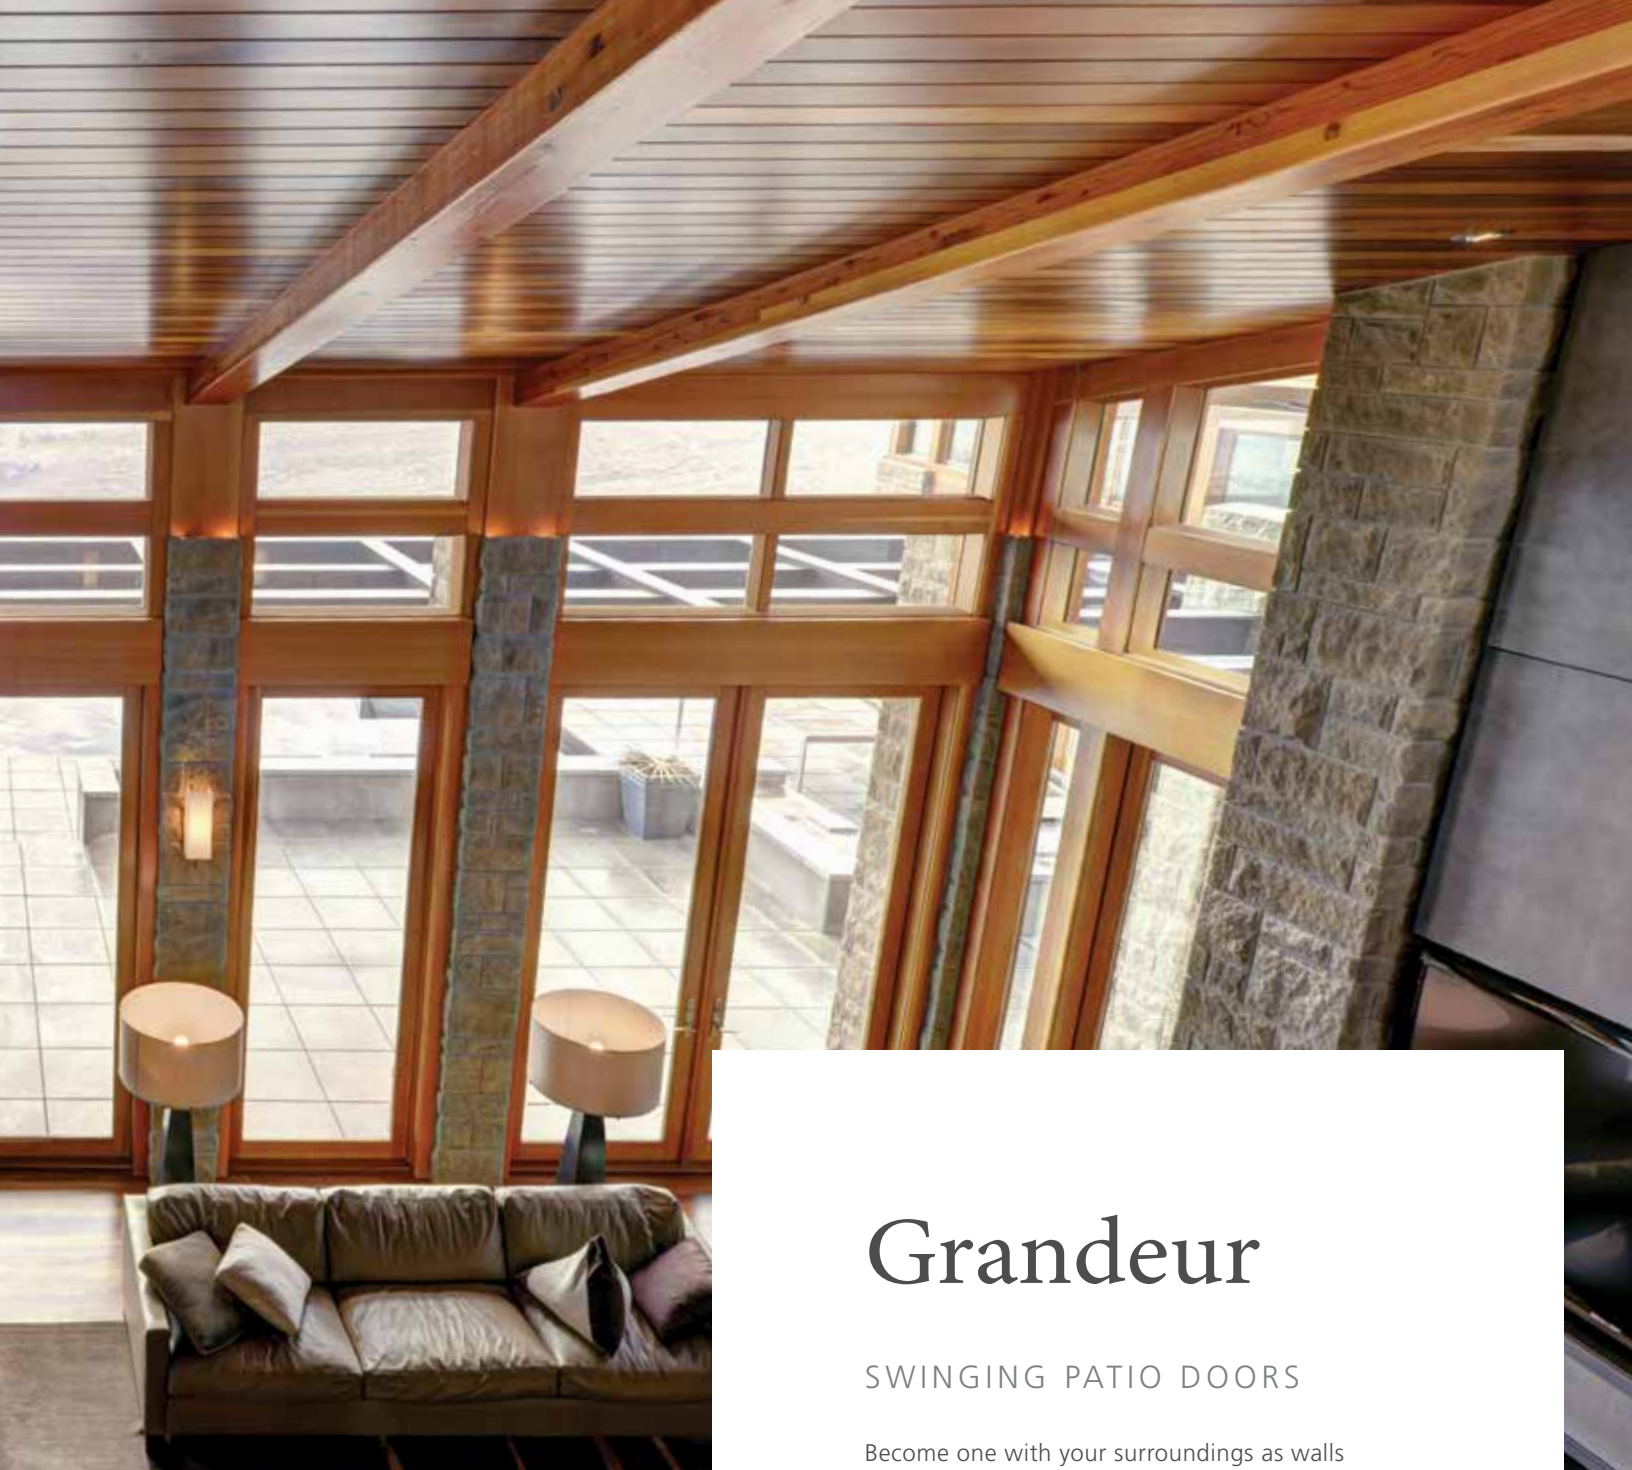

Asymmetrical sizing options make these doors truly special. Panels of different sizes can be ordered to fit the specific needs of a room or patio, creating exactly the right opening space and light source desired.

SWINGING PATIO DOOR

These single or French patio doors swing either out or in on side hinges. Both are built with the same design profile as our window line, with bottom rails as narrow as four inches.

Grandeur

SWINGING PATIO DOORS

Become one with your surroundings as walls melt away, placing nature front and center. Abundant natural light pours in, integrating your living space with the outdoors. With their modern design and simple operation, our patio doors are as functional as they are attractive.

Clarity

GLASS OPTIONS

EpicVue offers the most comprehensive, standard glass options on the market. Even what you can't see is impressive, such as the three coats of silver which line the glass, helping to make it the most energy efficient standard glass in the industry.

The options you can see make a big difference as well, including tinted and textured glass, providing privacy and individuality in proper doses.

LoE³-366® GLASS

This high-performance glass with insulating argon gas fill lowers energy costs and helps homes stay cool in the summer and warm in the winter. With windows this size, efficiency is both imperative and a standard feature.

NEAT® GLASS

As close to self-cleaning as windows can be. This impressive standard feature fills in the microscopic peaks and valleys on a pane of glass, creating an ultrasmooth surface. Dirt and debris on the glass slip away with the rain.

PRESERVE® GLASS

This protective film peels off after construction, taking paint, stucco, mud and other debris with it. It also protects against scratches during the building process.

SPACER BAR OPTIONS

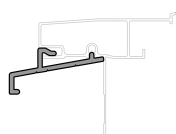

This thoughtfully created feature keeps you focused on the view rather than on a flash of metal between panes of glass. Black is standard, while gray and silver are options.

Exterior Options

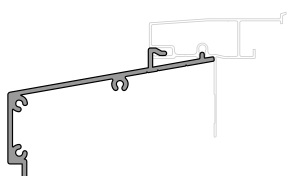

MAKE IT YOURS

Dozens of standard color choices, custom anodized options, multiple casing profiles. Of course with EpicVue as your starting place, you've already made a wise decision.

Hardware

WINDOWS	PATIO DOORS	
Nesting Handle	Gliding	Swinging/Folding
		
Available in: Authentic Oil-Rubbed Bronze*, Antique Brass, Polished Brass, Brushed Chrome, Polished Chrome, Powder-Coat Black, White, Satin Nickel*, Chestnut Bronze and Desert Sand		

*Options available with PVD.

FINISHES

				
White	Powder-Coat Black	Authentic Oil-Rubbed Bronze*	Chestnut Bronze	Desert Sand
				
Brushed Chrome	Polished Chrome	Antique Brass	Polished Brass	Satin Nickel*

In addition to style and finish choices, EpicVue offers single-point or multipoint locking mechanisms. The multipoint locking system is about more than security. With locking connections at the head, sill and lock itself, it helps the door maintain its shape and keep out water and weather.

*Note: Optional PVD finish for increased resistance to wear and discoloration available.

Note: Color swatches are for representation only and may not match our colors exactly.

Simulated Divided Lites

PARTITIONED ELEGANCE

Add architectural interest to your EpicVue™ windows and patio doors with simulated divided lites (SDL). From one large pane of glass, SDLs create the authentic look of individual panes of glass via decorative grilles attached to the interior and exterior of the glass. SDLs are available in a variety of colors as well as different profiles to achieve exactly the look you're after.

	INTERIOR		EXTERIOR	
5/8" SDL BAR				
				
7/8" SDL BAR

1 3/8" SDL BAR				
				
2 5/16" SDL BAR				
				

SIMULATED DIVIDED LITES (SDL)

Square sticking and glazing profiles create an elegant silhouette, offering clean lines of sight and unencumbered views.

Screens

PHANTOM SCREENS® TECHNOLOGY

These retractable screens provide wide-open views when you want them or breezy protection from the outdoors when you need it. They're durable, easy to operate and are available on awning and casement windows.

ULTRAVUE®

Today's screen options are capable of much more than keeping insects out. With a very fine fiberglass or aluminum mesh and light gloss finish for clearer views, UltraVue® insect screens are the very high standard offering on EpicVue. Available in charcoal or silver finishes, they provide ventilation and improved optical clarity.

PATIO DOOR SCREENS

As on our windows, UltraVue screens are standard on patio doors. However, you can choose either a bottom-rolling extruded (regular or heavy duty), or a top-hanging screen.

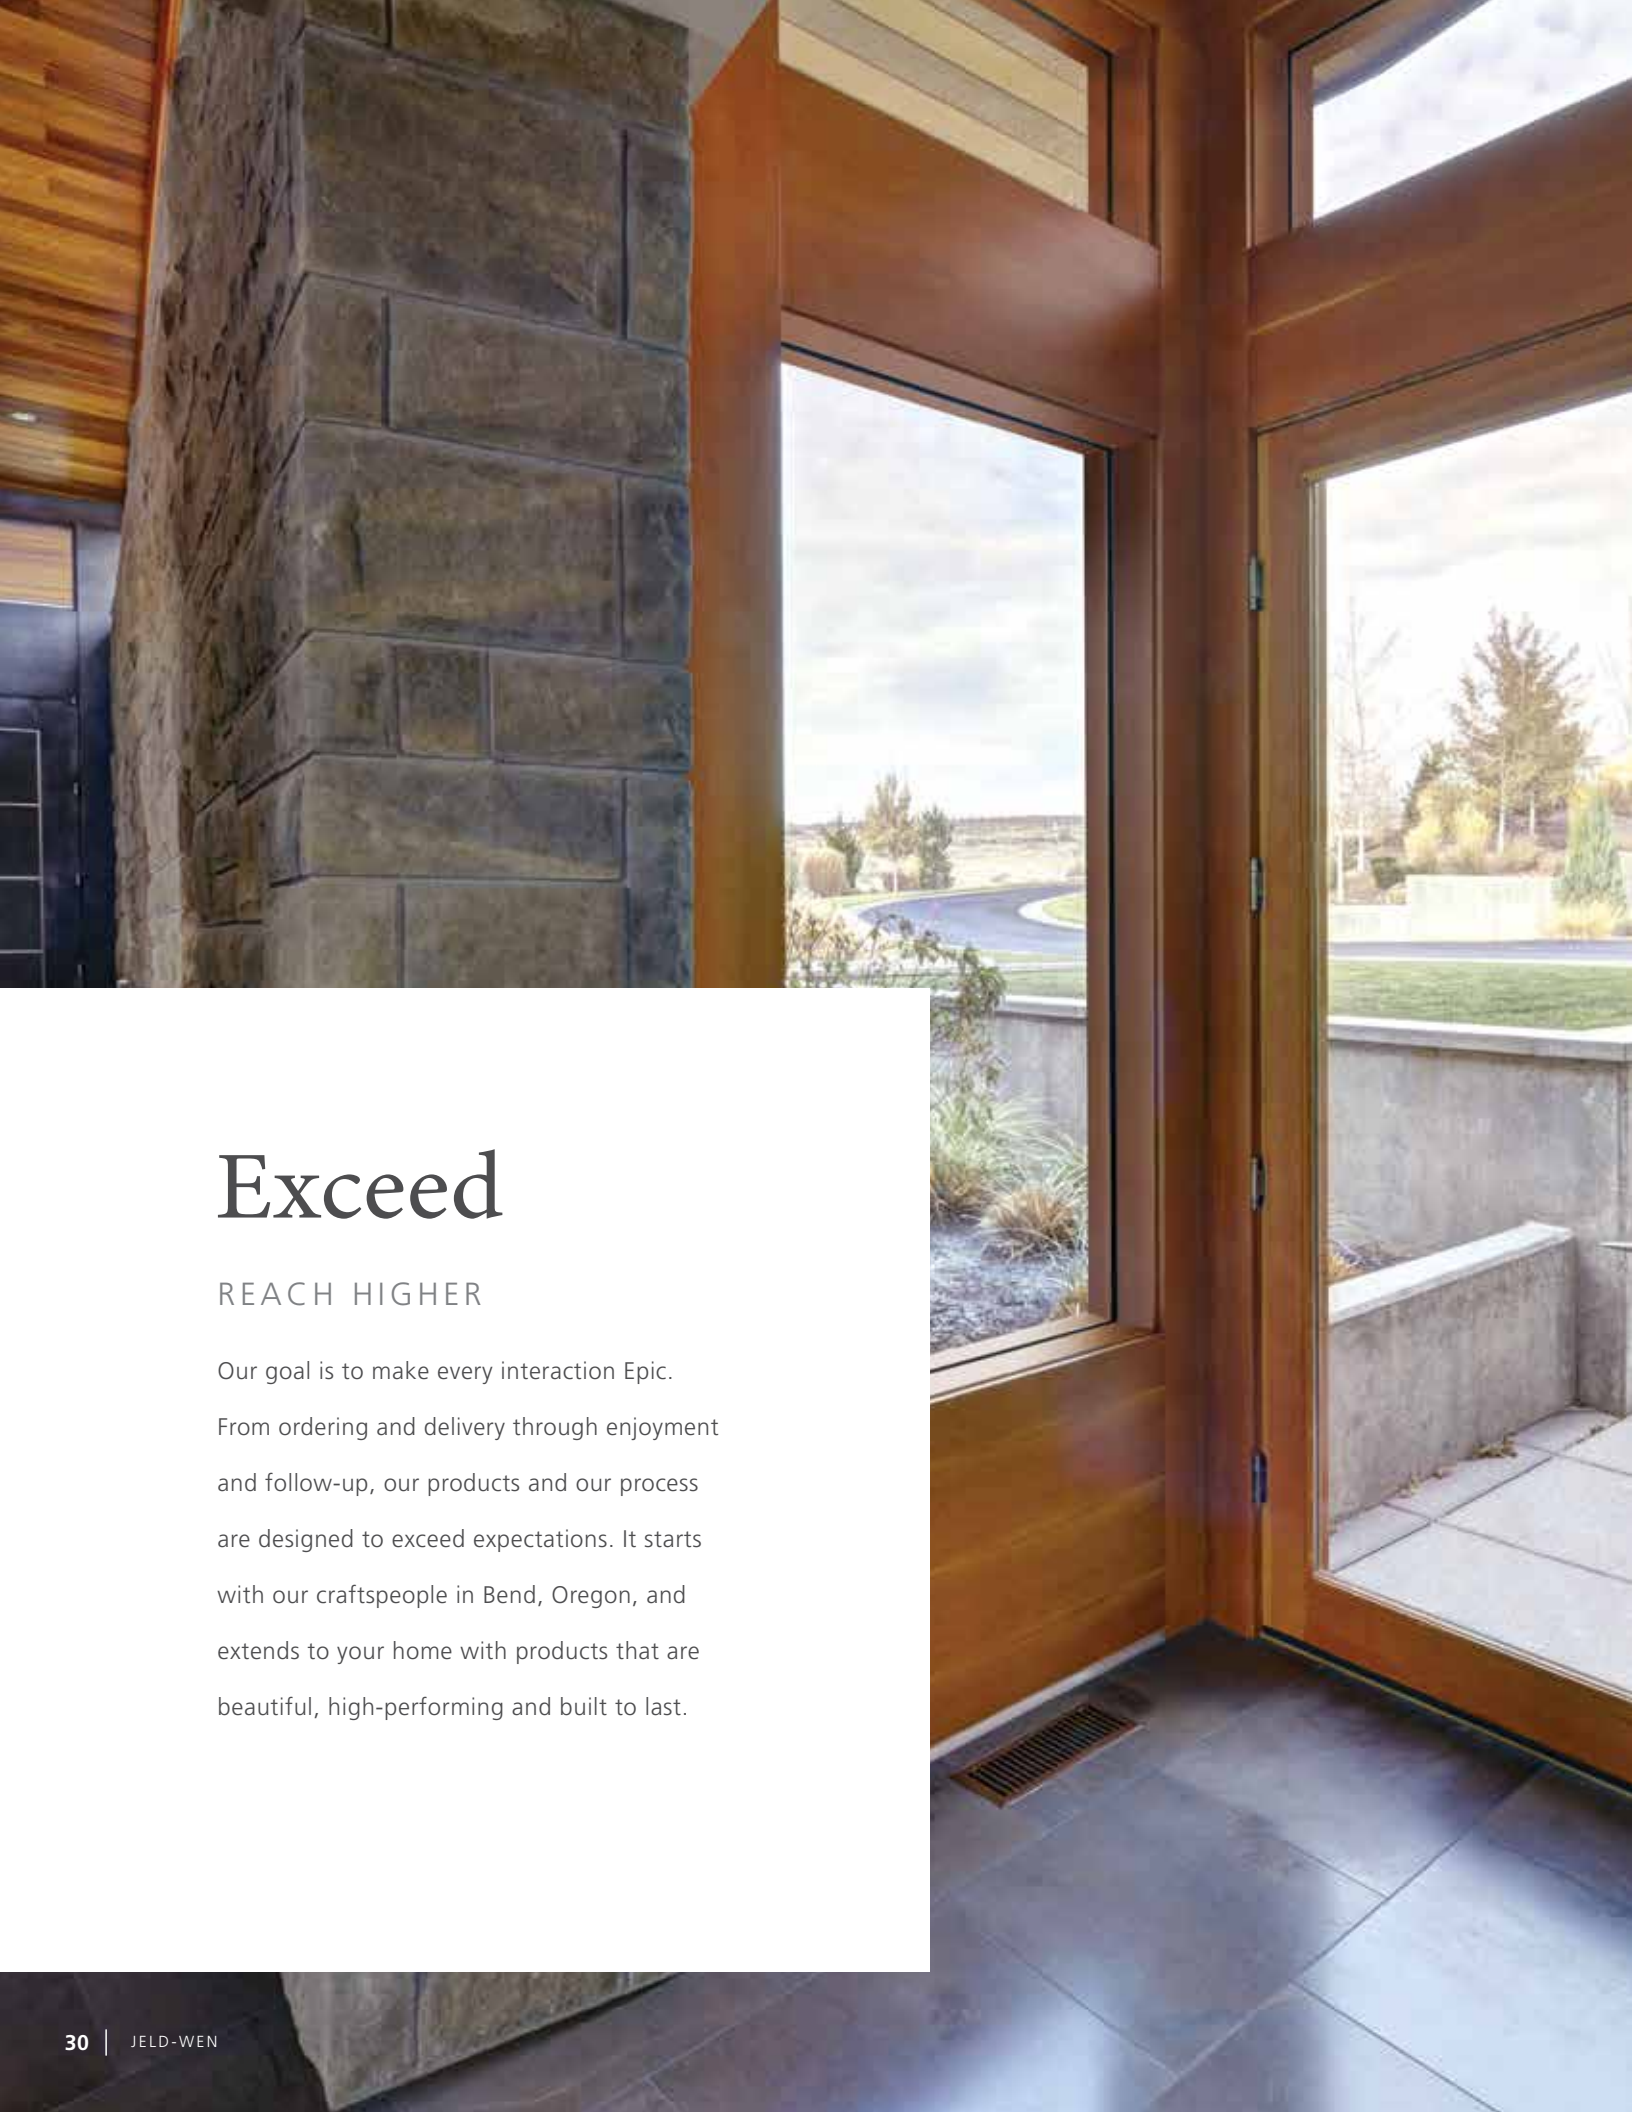

INDUSTRY STANDARD

Coarse mesh distracts,
and hinders view

ULTRAVUE® SCREEN

Fine mesh for clear viewing

Exceed

REACH HIGHER

Our goal is to make every interaction Epic. From ordering and delivery through enjoyment and follow-up, our products and our process are designed to exceed expectations. It starts with our craftspeople in Bend, Oregon, and extends to your home with products that are beautiful, high-performing and built to last.

ARCHITECTURAL SERVICES

A product this extraordinary calls for extraordinary service as well.

EpicVue™ products are made specifically for your project, on your schedule. Our knowledgeable design consultants work in concert with architects, reviewing BIM files, 3D models and more as needed. It's not just a custom product, it's a custom process with orders fulfilled quickly and accurately to ensure that your project is everything you imagined.

WARRANTY AND CERTIFICATIONS

If there's pride in owning EpicVue, imagine the pride in creating them. That's a big reason why we stand behind these windows and doors with our 20-year limited warranty—although the craftsmanship suggests that you enjoy them even longer. In our view, sustainability isn't just about forestry. It's about customers for life.
