EXTERIOR WOOD DOOR COLLECTION

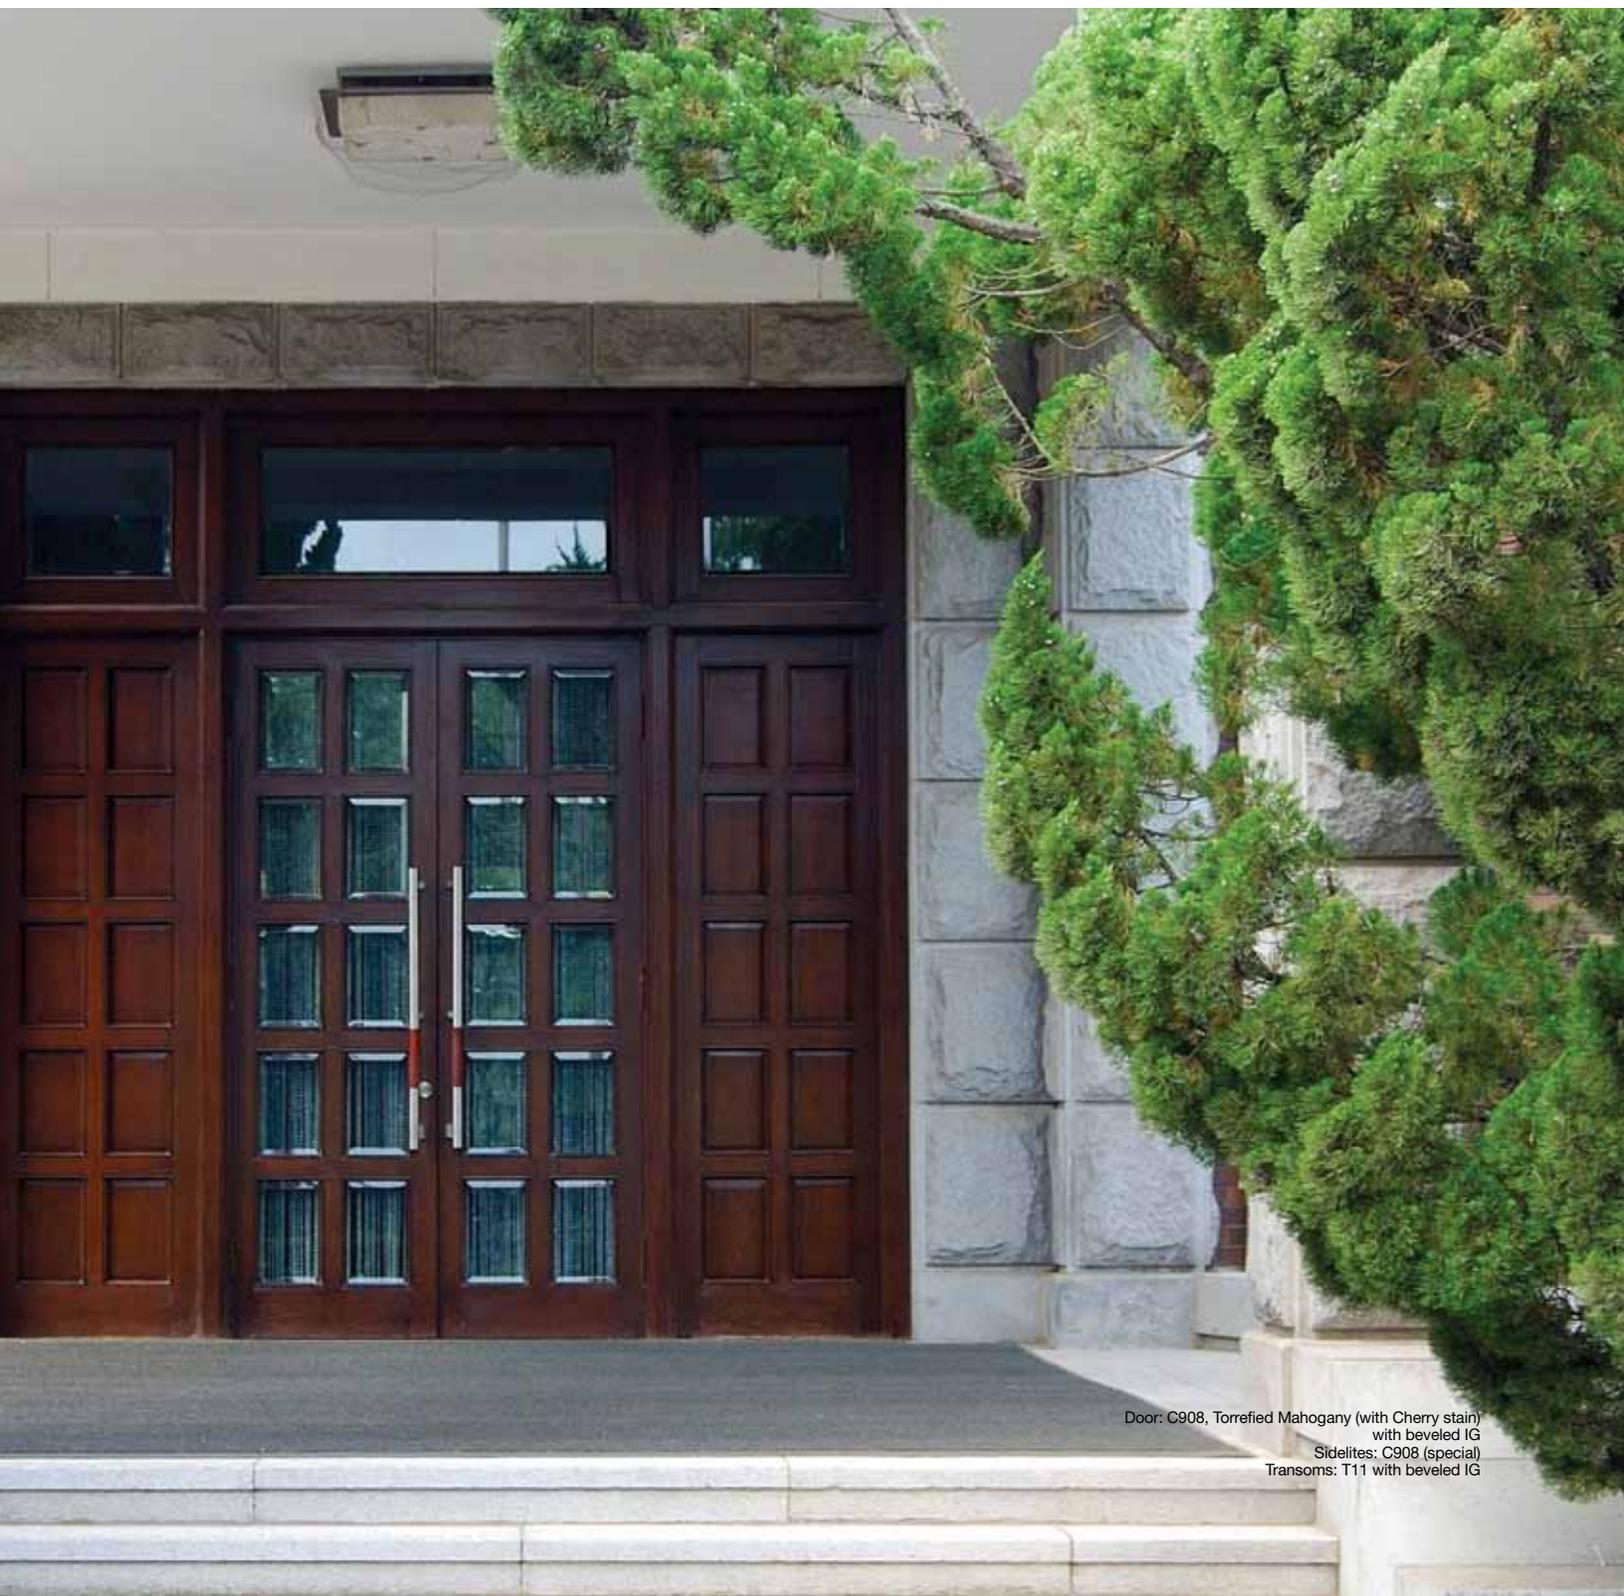

AN OPEN DOOR ON STYLE, FLEXIBILITY AND DURABILITY.

INNOVATION

Innovation is synonymous with Lemieux Doors. We're an ideal synthesis of technology and dynamism, proudly defining the leading edge. And Lemieux is in a state of constant evolution, offering unparalleled competitiveness and value through efficient, streamlined operations. The Lemieux Doors team is focused on creating the highest quality products – and we consider it to be an asset without compare.

LEMIEUX DOORS COLLECTION

Choice & Selection. Words used all too often by home decoration manufacturers and retailers when, in fact, there isn't much to choose from. However, as you'll soon discover, if any company is the embodiment of these two words, it's Lemieux Doors.

Satisfaction – it all comes down to choice. Your choice. Wood, glass – panel design, shape, color, finish, texture, and even the way your door is built. We could probably make a different door an hour for an entire decade before making the same door twice. Far more than embody the concepts of choice & selection, we've completely redefined them.

However there's one thing Lemieux Doors doesn't offer any choice on – quality. Regardless of how you custom-design your door, or what method of fabrication and assembly fits your lifestyle or pocketbook, quality, and the best product warranties in the industry come standard with every single door we make. Lemieux Doors really has opened the door on style, flexibility and durability. Now it's time to cross our threshold and explore the infinite possibilities...

PERSONALIZE YOUR DOOR IMAGINATION COMES TO LIFE

Lemieux Doors is recognized as the premiere maker of custom-designed top-quality doors. But that didn't happen by accident. Since our inception, we've dedicated ourselves to creating doors that outlast the elements, endure the years, and have a timeless quality that weather even the frequent temperamental changes in trends and styles.

It's only through the use of advanced methods of fabrication and the highest quality materials that our stellar reputation has emerged. A relentless attention to detail, the dogged pursuit of excellence, and the absolute refusal to be second best have always been our driving force – and where our competitors have been known to cut corners, we've gone the extra mile. That Lemieux Doors look great is a given. But it's what goes into each and every one of them that has truly made them the envy of the industry.

PERSONALIZE YOUR DOOR AS SIMPLE AS 1-2-3

ALL THAT'S LEFT TO ADMIRE
ARE THE EXCEPTIONAL RESULTS.
IT'S THAT EASY.

With our modular approach to customizing and design, creating a door that's both an attractive, harmonious extension of your décor, and one you can call your own, has never been easier. We're also developing new ways to process estimates with our exclusive Lemieux Doors Quoting System (LDQS). We've designed our world so that yours is easier to live in, and we're convinced that better doors will always lead the way into better buildings.

LVL CORE TECHNOLOGY

WHAT WE PUT INTO EACH LVL DOOR IS EXACTLY WHAT YOU'LL GET OUT OF IT. EXCEPTIONAL QUALITY AND DURABILITY.

Laminated Veneer Lumber (LVL). The name instills a sense of robustness and durability. LVL derives its strength from an impressive number of tightly bonded wood veneers, glued together layer upon layer, forming a solid tension-resistant core. Since the layers of veneer are arranged on edge, our LVL core withstands all tendency to warp and twist. It's a small detail that makes a big difference, and the advantages of employing this proven design allows us to avoid using weaker MDF as a core material. Our competition doesn't use LVL because it costs more. But Lemieux understands that the benefits of a longer lasting, better built product far outweigh the higher cost. **Every LVL door comes with a solid 20-year warranty against warping.** Available in all species, panels, glasses and design.

HIGHEST PERFORMANCE AVAILABLE

TORREFIED SOLID WOOD

PREMIUM EXTERIOR WOOD DOORS AVAILABLE IN SELECT GRADE ASPEN, DOUGLAS FIR, MAHOGANY AND POPLAR

CHEMICAL FREE TECHNOLOGY **THERE'S NEVER BEEN A DOOR THIS GOOD. EVER.**

Torrefication is an all-natural green process whereby wood is heated in order to eliminate its tendency to rot. It also makes wood far more structurally stable, and highly resistant to heat, cold, and moisture!

A 20-YEAR WARRANTY THAT'S AS DURABLE AS TIME. **SO, MOTHER NATURE... BRING IT ON!**

Every Torrefied Series exterior wood door carries a 20-year guarantee against warping, twisting, rotting or delamination! Who knows, it may even outlast your home!

UNLIMITED POSSIBILITIES UNLIMITED DESIGNS

The Torrefied Series is available in each of Lemieux's 10,000+ design options – and our 4/0 maximum widths and 8/0 heights are fully guaranteed, with available matching exterior jambs, brickmoulding and T-astragals.

IT'S OVER WITH OVERHANGS!

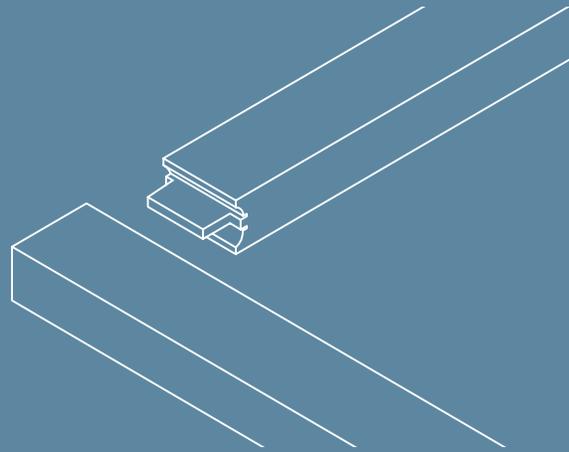

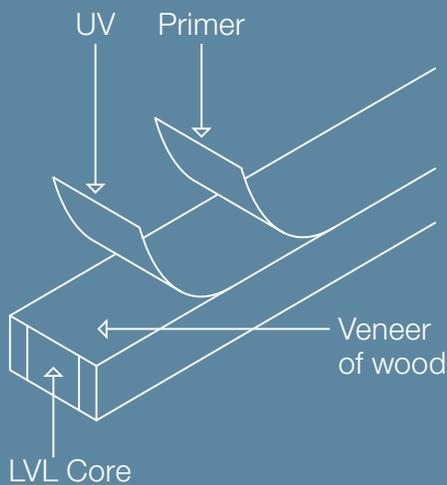

This may be the first time a door of comparable quality can be installed without the usual overhang requirements. A door built to face up to the elements; direct sunlight and extreme heat and cold. What's more it can be stained or painted in dark tints! **For the 20-year warranty to be honored, all six sides of the door must be sealed and maintained.**

TESTED TO THE EXTREME!

We stop at nothing to design a better door. In fact, we've been subjecting one of our doors to a daily deluge of abuse since October 2010 – and we're still waiting for the twisting, warping or rotting to show.

A BLUEPRINT FOR EXCELLENCE

UV SEALANT ON PRIMED PRODUCTS

Our proprietary UV coating process guarantees every door is delivered ready-to-paint, soon to be transformed into an aesthetically pleasing component of any building design. We apply two coats of UV sealer in order to achieve a smooth door surface, before factory priming. The result is one of the smoothest primed finishes you'll find in the industry, and an extraordinary door.

VENEER PANELING

Our standard veneer panels carry a lifetime warranty against splitting, so you know light won't leak, drafts won't blow, and paint or stains won't show. Nor will these panels ever bow, cup, or warp!

MORTISE AND TENON CONSTRUCTION

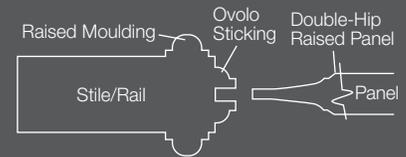

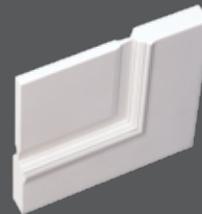

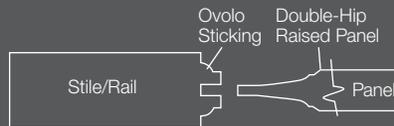

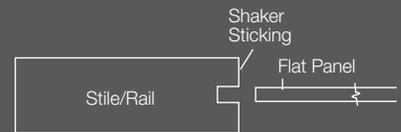

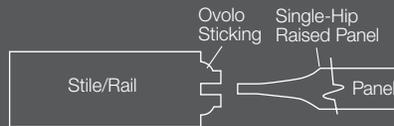

It's as versatile as it is strong – superior to typical dowel assembly, mortise and tenon construction permits a continuous bond for much higher adhesion – plus, on-site trimming becomes a snap!

BEST QUALITY GLUES

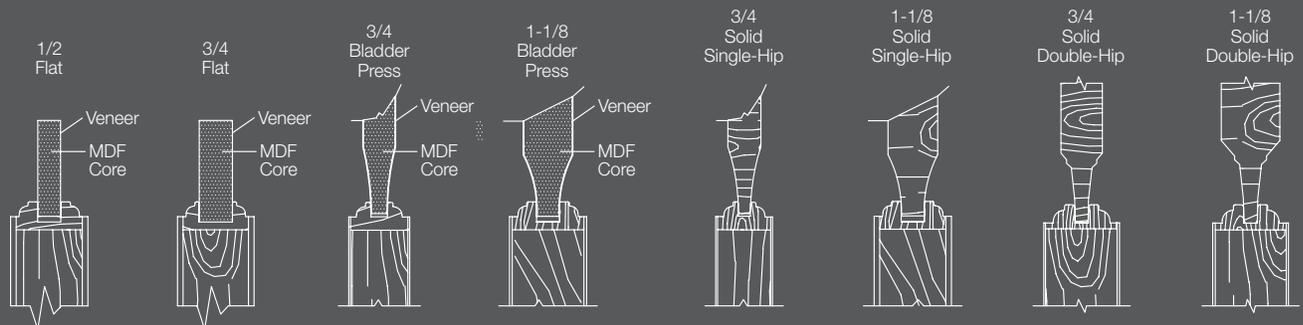

Our engineering team spares no effort and is constantly on the watch for the best gluing/bonding technologies. For each application a very specific type of glue is used, ensuring the most effective adhesion. Glues used at Lemieux Doors are also used for heavy-duty structural applications such as bridges and multi-story buildings. Each and every Lemieux door is manufactured in our state-of-the-art production facility and is the result of countless hours of research and development.

Lemieux Doors Collection boasts a variety of high-grade wood species, precision handcrafted using vertical stiles and horizontal rails in your choice of panels and/or glass, ready to stain or paint. Stile & rail construction offers virtually limitless door styles, configurations, panel and sticking profiles.

PANEL/STICKING OPTIONS

Raised moulding available only on square-top primed MDF doors.

STILE & RAIL DOORS DEFINED

MULLION: narrow vertical sections between panels **MUNTIN:** slim vertical pieces used to separate panes of glass; grille bar **PANEL:** pieces that fit within the surrounding stile & rail frame that come in different profile designs – single-hip, double-hip and flat **RAIL:** horizontal pieces of the door; includes top, bottom and sometimes lock rails **STICKING:** the design of the profile edge on the stile and rail; ovolo is carved and rounded; shaker is straight and squared **STILE:** vertical pieces of the door

Round-Top

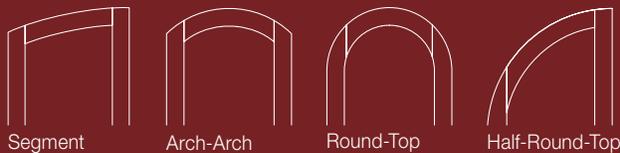

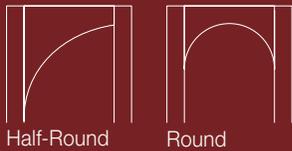

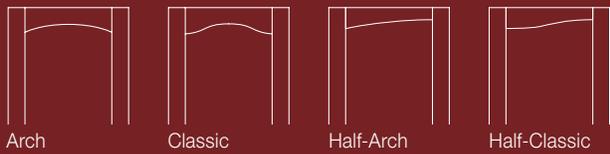

Segment

DOOR TOPS

Cap off any Lemieux door with a crown befitting a king – no longer limited to a straight top, you can indulge in a semi-circular or arched-top doors. Either of which will make a door step out of the ordinary, and into the limelight.

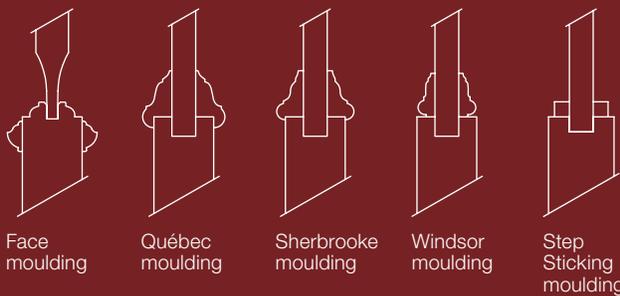

C11, Torrefied Mahogany, segmented (special radius), flat panel with Sherbrooke applied moulding

TOP RAIL

Your imagination is the only limit to creating the look you've always wanted and the key to creating a home that is truly unique. Turn yours into a space that will be envied and admired. With all the options available for glass, panels, wood specie, designs, and applied mouldings – it's only fitting to cap it all off with a touch of class and elegance.

APPLIED MOULDINGS

A door can truly come alive when you add depth with our relief-accentuating mouldings. Transform a simple door into a structural element with dimensional impact and an impressive distinction. Lemieux offers 4 types of applied mouldings, and they're an easy way to leave your impression on a building decor. They allow you to sign each door with excellence, creating surfaces with daring and definition.

Double-rabbet jamb (4 9/16" and 6 9/16")

Single-rabbet jamb (4 9/16" and 6 9/16")

Flat jamb (4 9/16" and 6 9/16")

EXTERIOR FRAMES FOR ROUND AND ARCH-TOP DOORS ONLY

Because we also carry a full line of exterior frames for round and arch-top doors, every component of your door design originates from the same source.

Gone are the annoying structural and aesthetic incompatibilities that can arise from multi-sourced materials. Our turnkey solutions are designed to fit, last, and of course, to impress.

WOOD SELECTION

The suppleness of maple, the warmth of pine, the richness of mahogany – your choice of wood can make all the difference. What matters is that it suits your tastes and style, and achieves the effect you're looking for. Lemieux Doors prides itself on offering an impressive selection of woods that adapt gracefully to any decor and give your home an irresistible ambiance.

We've traveled the world so that we might bring you the best, managed-forest woods available. Responsible forest management is an important part of our philosophy, and ensures access to a renewable supply for years to come. That's more than can be said for resource depleting materials like steel, and fiberglass!

Lemieux offers 17 attractive stain-grade species and, excluding the double-primed variety, are all 100% stain grade. And because we've standardized the use of the stain-grade species across all our products, Lemieux's applied mouldings, and jambs doors can be perfectly matched to any other of our components.

GLASS OPTIONS

With over 63 varieties of glazing, Lemieux offers the widest array of any door manufacturer. From crystal-clear, to frosted and semi-opaque, patterned or plain – we'll custom-build doors that will work in harmony with your plans, enhancing your design intention and make any building worthy for inclusion into the proudest architectural portfolios. Incorporating the right exterior door into your designs offers numerous advantages – and Lemieux provides two essential glazing technologies:

LOW-E

The added bonus lies in the properties of Low-E glass; the ability to eliminate the damaging effects of UV radiation on carpets, furnishings and upholstery.

INSULATED GLASS

Our high-quality reduced-thermal-emissivity glass not only reflects back solar heat in summer, and retains it in winter, but helps reduce exterior noise and eliminate potential condensation. So the buildings you design are not only energy-efficient, they're more comfortable and economical.

FRENCH DOORS COLLECTION

This is a company that prides itself on its specialty for exceptional French doors. We avoid the use of nails and staples using a clamp-glazed method perfected by Lemieux in 1992, resulting in a clean, unblemished finish. It's an innovation that's had a definite impact, and helped Lemieux Doors become a leader in North American French door sales. Time-tested mortise & tenon construction, and a pioneering UV sealer system all contribute to the production of these outstanding French doors.

Explore our wide range of glazing on pages 22 to 25.

LE CHATEAU COLLECTION

This stunning collection of panelled doors is available in an almost endless range of design combinations, each of which will add undeniable sense of elegance and distinction to any room. Constructed from MDF panelling for increased strength and stability, these doors are resistant to cracks and leaks caused by thermal expansion and contraction. Advanced engineering of rails and stiles creates a door that is not only lighter, but requires no special screws for installation.

Enjoy a sense of added depth and heightened impact by adding distinctive applied mouldings to any Le Chateau door.

ARTISAN COLLECTION

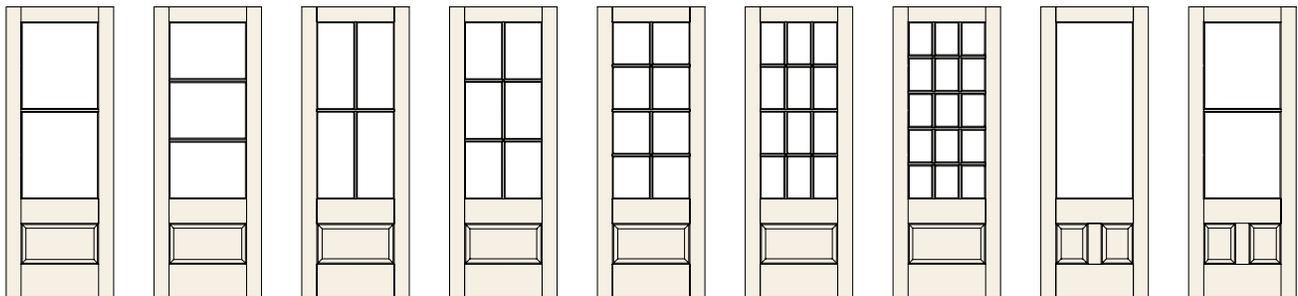

The charm of the countryside is captured in the Artisan Collection. Their rustic appeal well deserved: these are doors built by true craftsmen! Unparalleled attention to detail and quality aside, they're among the best doors available today – complete with durable MDF panel components and a solid warranty against splitting. We also offer nature's own Solid Wood panels, with our entire selection of species and designs available. Add to that raised mouldings, top rail designs and the widest selection of glazing offered by any door maker, and you'll realize just how easily the Artisan Collection can deliver a unique door created expressly for you and your home décor.

Explore our wide range of glazing on pages 22 to 25.
