Bringing light to life has been our passion for over 75 years.

So, why skylights?

In 1942 in the Danish city of Copenhagen, a young engineer came up with the idea to transform dark, empty attics into bright living spaces. This idea developed into the first handcrafted, no-leak roof window, which became the foundation for VELUX to grow into the number one skylight company in the world.

At VELUX, we believe homes full of light are homes that are full of life, that daylight is powerful and fresh air is invigorating. Together, they improve our general health and well-being, decrease our dependence on electricity, and give functionality back to our space. Able to fit just about anywhere in your home, VELUX skylights deliver unmatched quality, beautiful results, and a brighter home for your family.

We often ask, "Why skylights?" But with endless reasons to install one, the question becomes more, "Why not skylights?"

VELUX America LLC
450 Old Brickyard Road
PO Box 5001

Phone: 1-800-888-3589
Fax: 1-864-943-2631

A close-up, low-angle shot of a dark, metallic skylight frame. The frame is covered in numerous water droplets of varying sizes, which are catching the light and creating a shimmering effect. The background is a solid, dark blue or black, providing a high contrast for the metallic frame and the white text.

The No Leak Warranty

Our biggest promise that the skylights you add to your home will not leak.

VELUX's three patented layers of water protection work seamlessly to ensure no rain will leak into your home through your skylight.

These are not your parents' skylights.

Skylights that open. Skylights that won't leak. Skylights that lower your carbon footprint. Skylights that respond to the sound of your voice. Flat skylights, domed skylights, and skylights that turn into balconies. These are the kinds of skylights you'll find at VELUX. A passion for daylight, fresh air, and better living environments is what started our company over 75 years ago, and it's what drives us forward today.

A skylight that thinks for itself.

VELUX ACTIVE with NETATMO gives you the power to open and close your skylights and blinds with the sound of your voice or a touch of a button on your smartphone. What's more, with VELUX ACTIVE, your skylight learns your ideal home climate and works to match your comfort level by opening and closing automatically.

Kitchens

COOKING IN DAYLIGHT

A kitchen that's full of light and fresh air is a happy, healthy kitchen. When we start to look at kitchen upgrades, we tend to look around instead of up. Enhance your cooking area with natural light through skylights. It's one of the best ways to get the most out of the sights, smells, and even tastes created in your kitchen.

Get This Look

Bathrooms

TIME TO FRESHEN UP

The days of function-only bathrooms are behind us. It's time to create the luxurious, spa-like room you deserve. With a skylight, you can bring the outside in without sacrificing privacy and turn off the noisy bathroom fan in favor of cool, fresh air. Transform your bathroom into your own personal oasis - it's as simple as looking up!

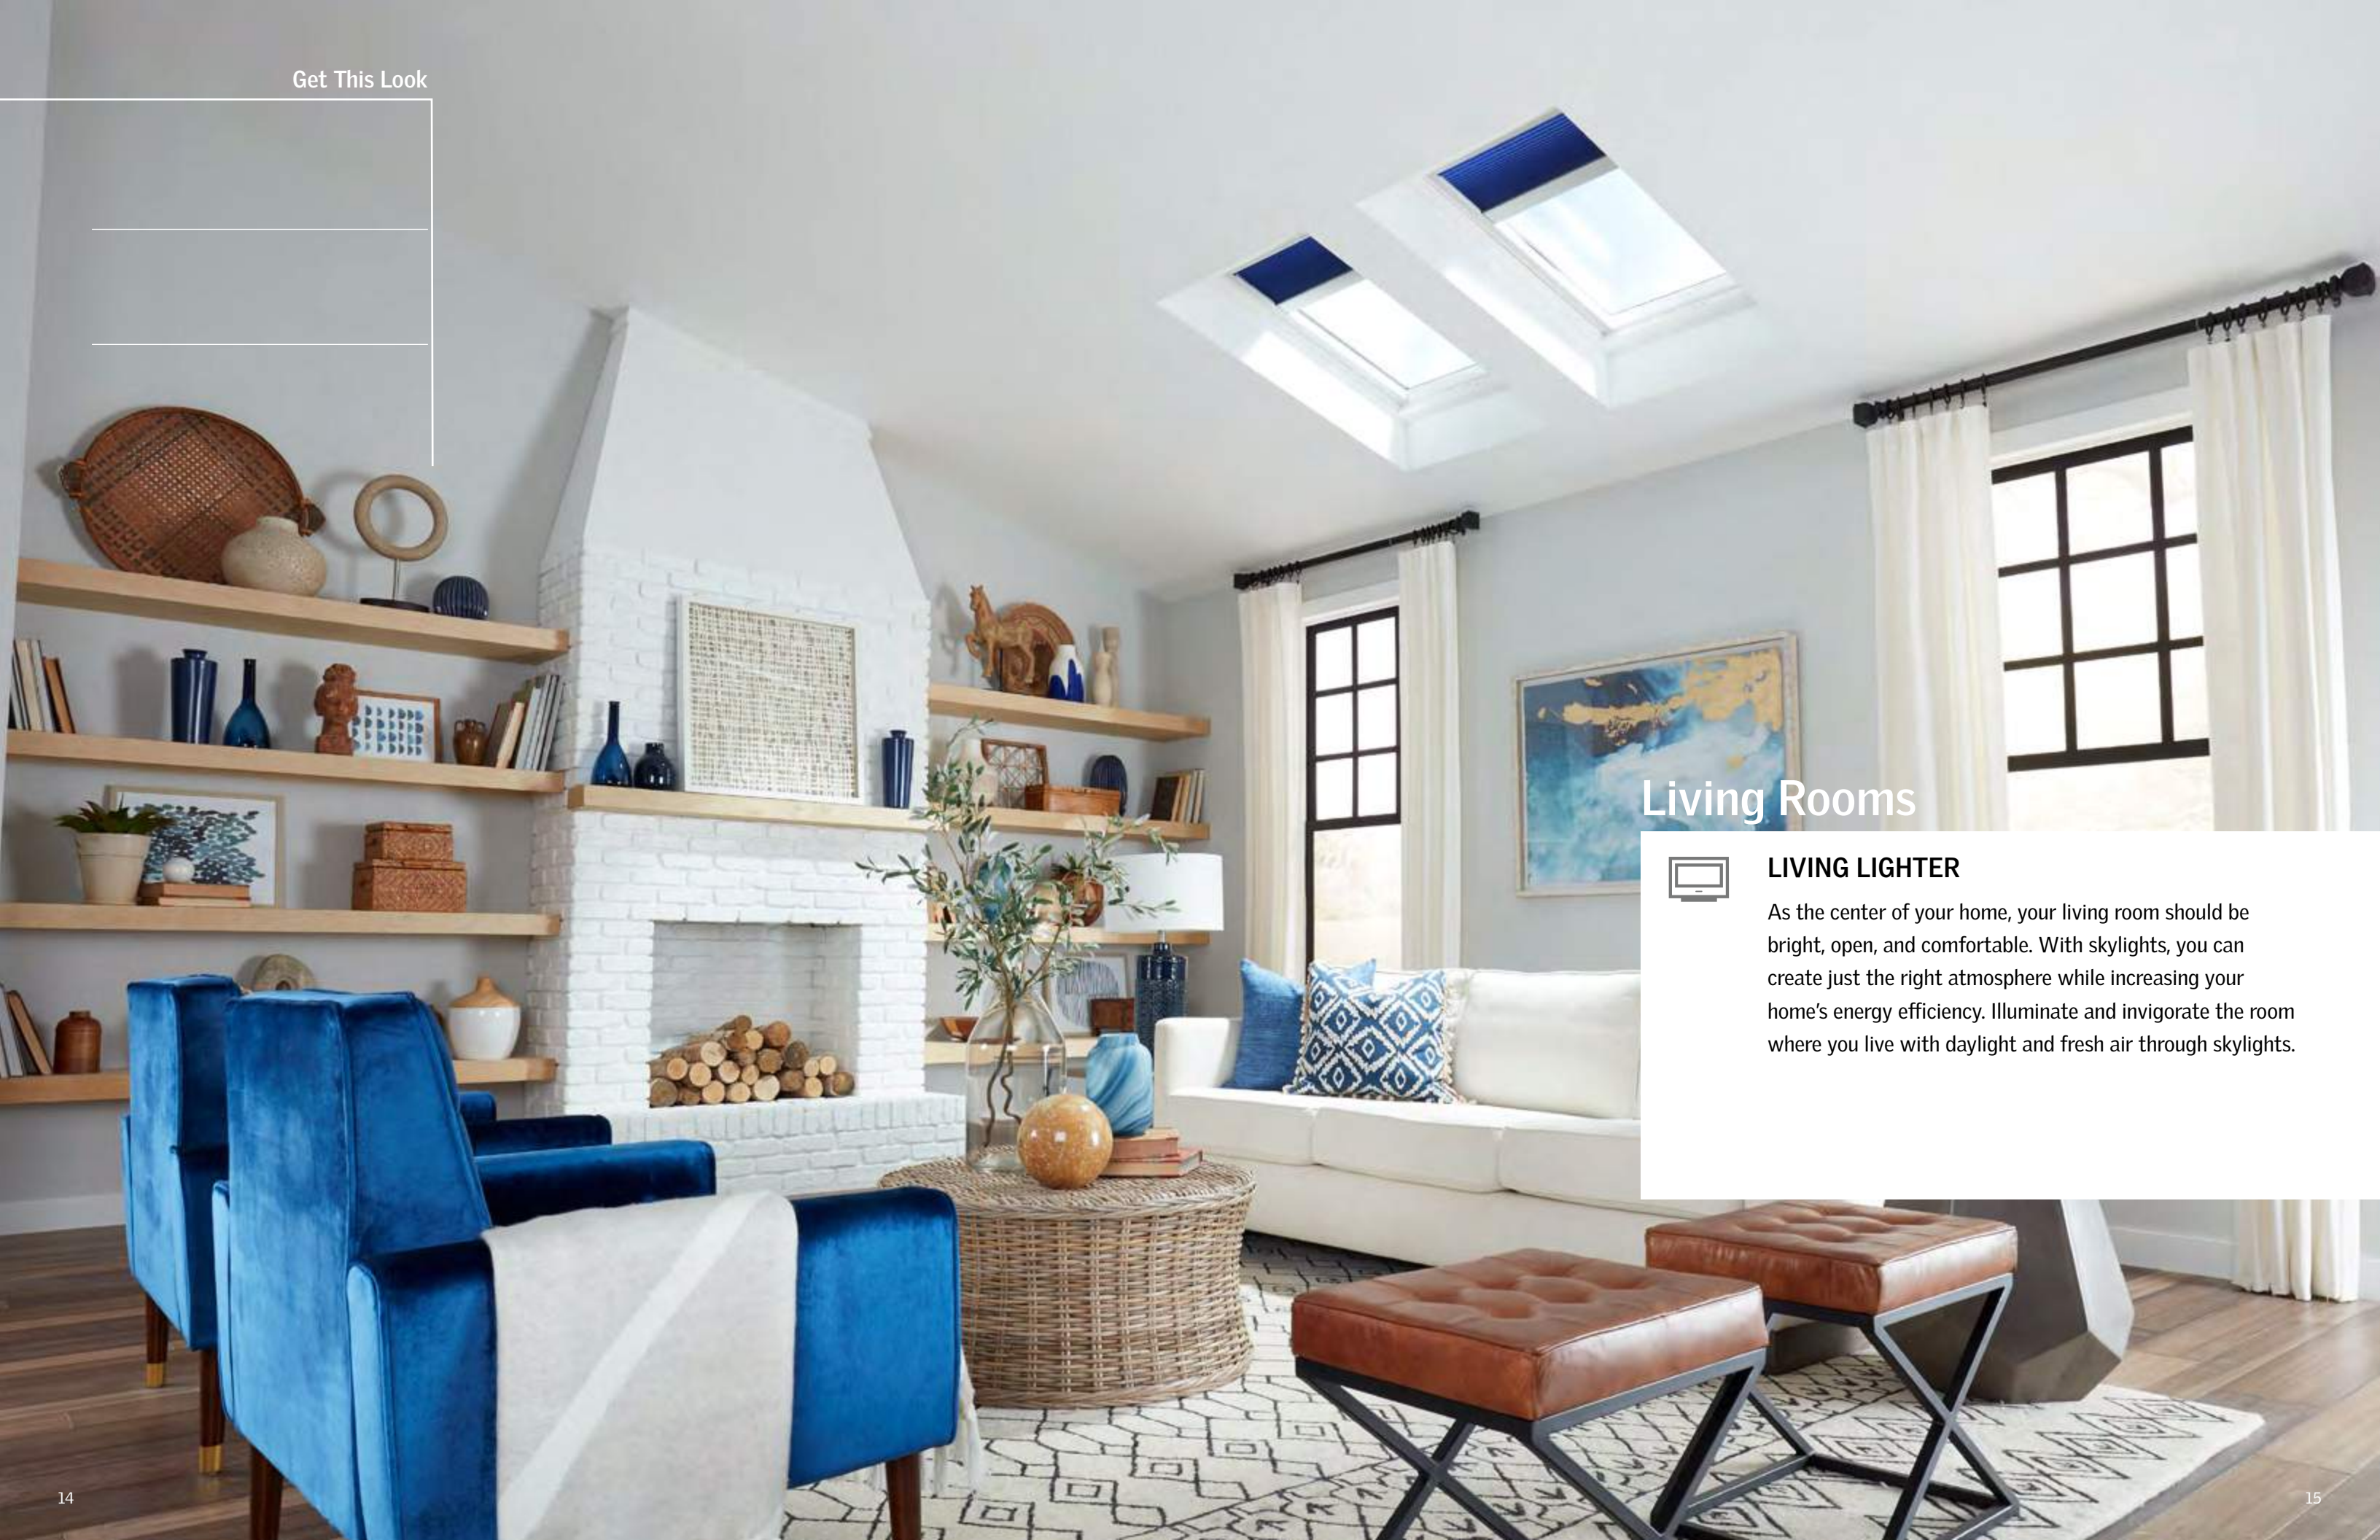

Get This Look

Bedrooms

SLEEP UNDER THE STARS

Your bedroom is a place to recharge your body and mind, and skylights can help you make the most of it. Regular exposure to sunlight regulates your Circadian rhythm, which helps you sleep sounder and wake up feeling refreshed. When you open your bedroom up to the sky, you welcome in clear, natural light and a starry expanse at night for better sleep and more productive days.

Living Rooms

LIVING LIGHTER

As the center of your home, your living room should be bright, open, and comfortable. With skylights, you can create just the right atmosphere while increasing your home's energy efficiency. Illuminate and invigorate the room where you live with daylight and fresh air through skylights.

Get This Look

Bonus Rooms

BONUS DAYLIGHT

Bonus rooms are notorious for being the dim, catch-all rooms, so fill yours with daylight! The best way to redesign your space into a multi-functional room the whole family will enjoy is with rich, natural light and crisp, fresh air. Skylights and roof windows can offer you more design possibilities than traditional windows to help transform your room in the roof.

Small Spaces

NATURAL LIGHT EVERYWHERE

Small spaces like hallways, closets, and laundry rooms can be hard to illuminate, especially with daylight. But with VELUX's innovative skylights, roof windows, and sun tunnels, you can bring in enough daylight and, in some places, fresh air to turn every corner of your home into something extraordinary.

Patios

A ROOM OF LIGHT

Patios are the best of both worlds: all the amenities of being inside with the atmosphere of the great outdoors. Adding more daylight and fresh air with skylights is the next best step to upgrading your patio. And when you install skylights on your patio, they don't just affect that space; borrowed light spills into the surrounding interior rooms, helping brighten your entire home.

Daylight Renovations from Real Homeowners

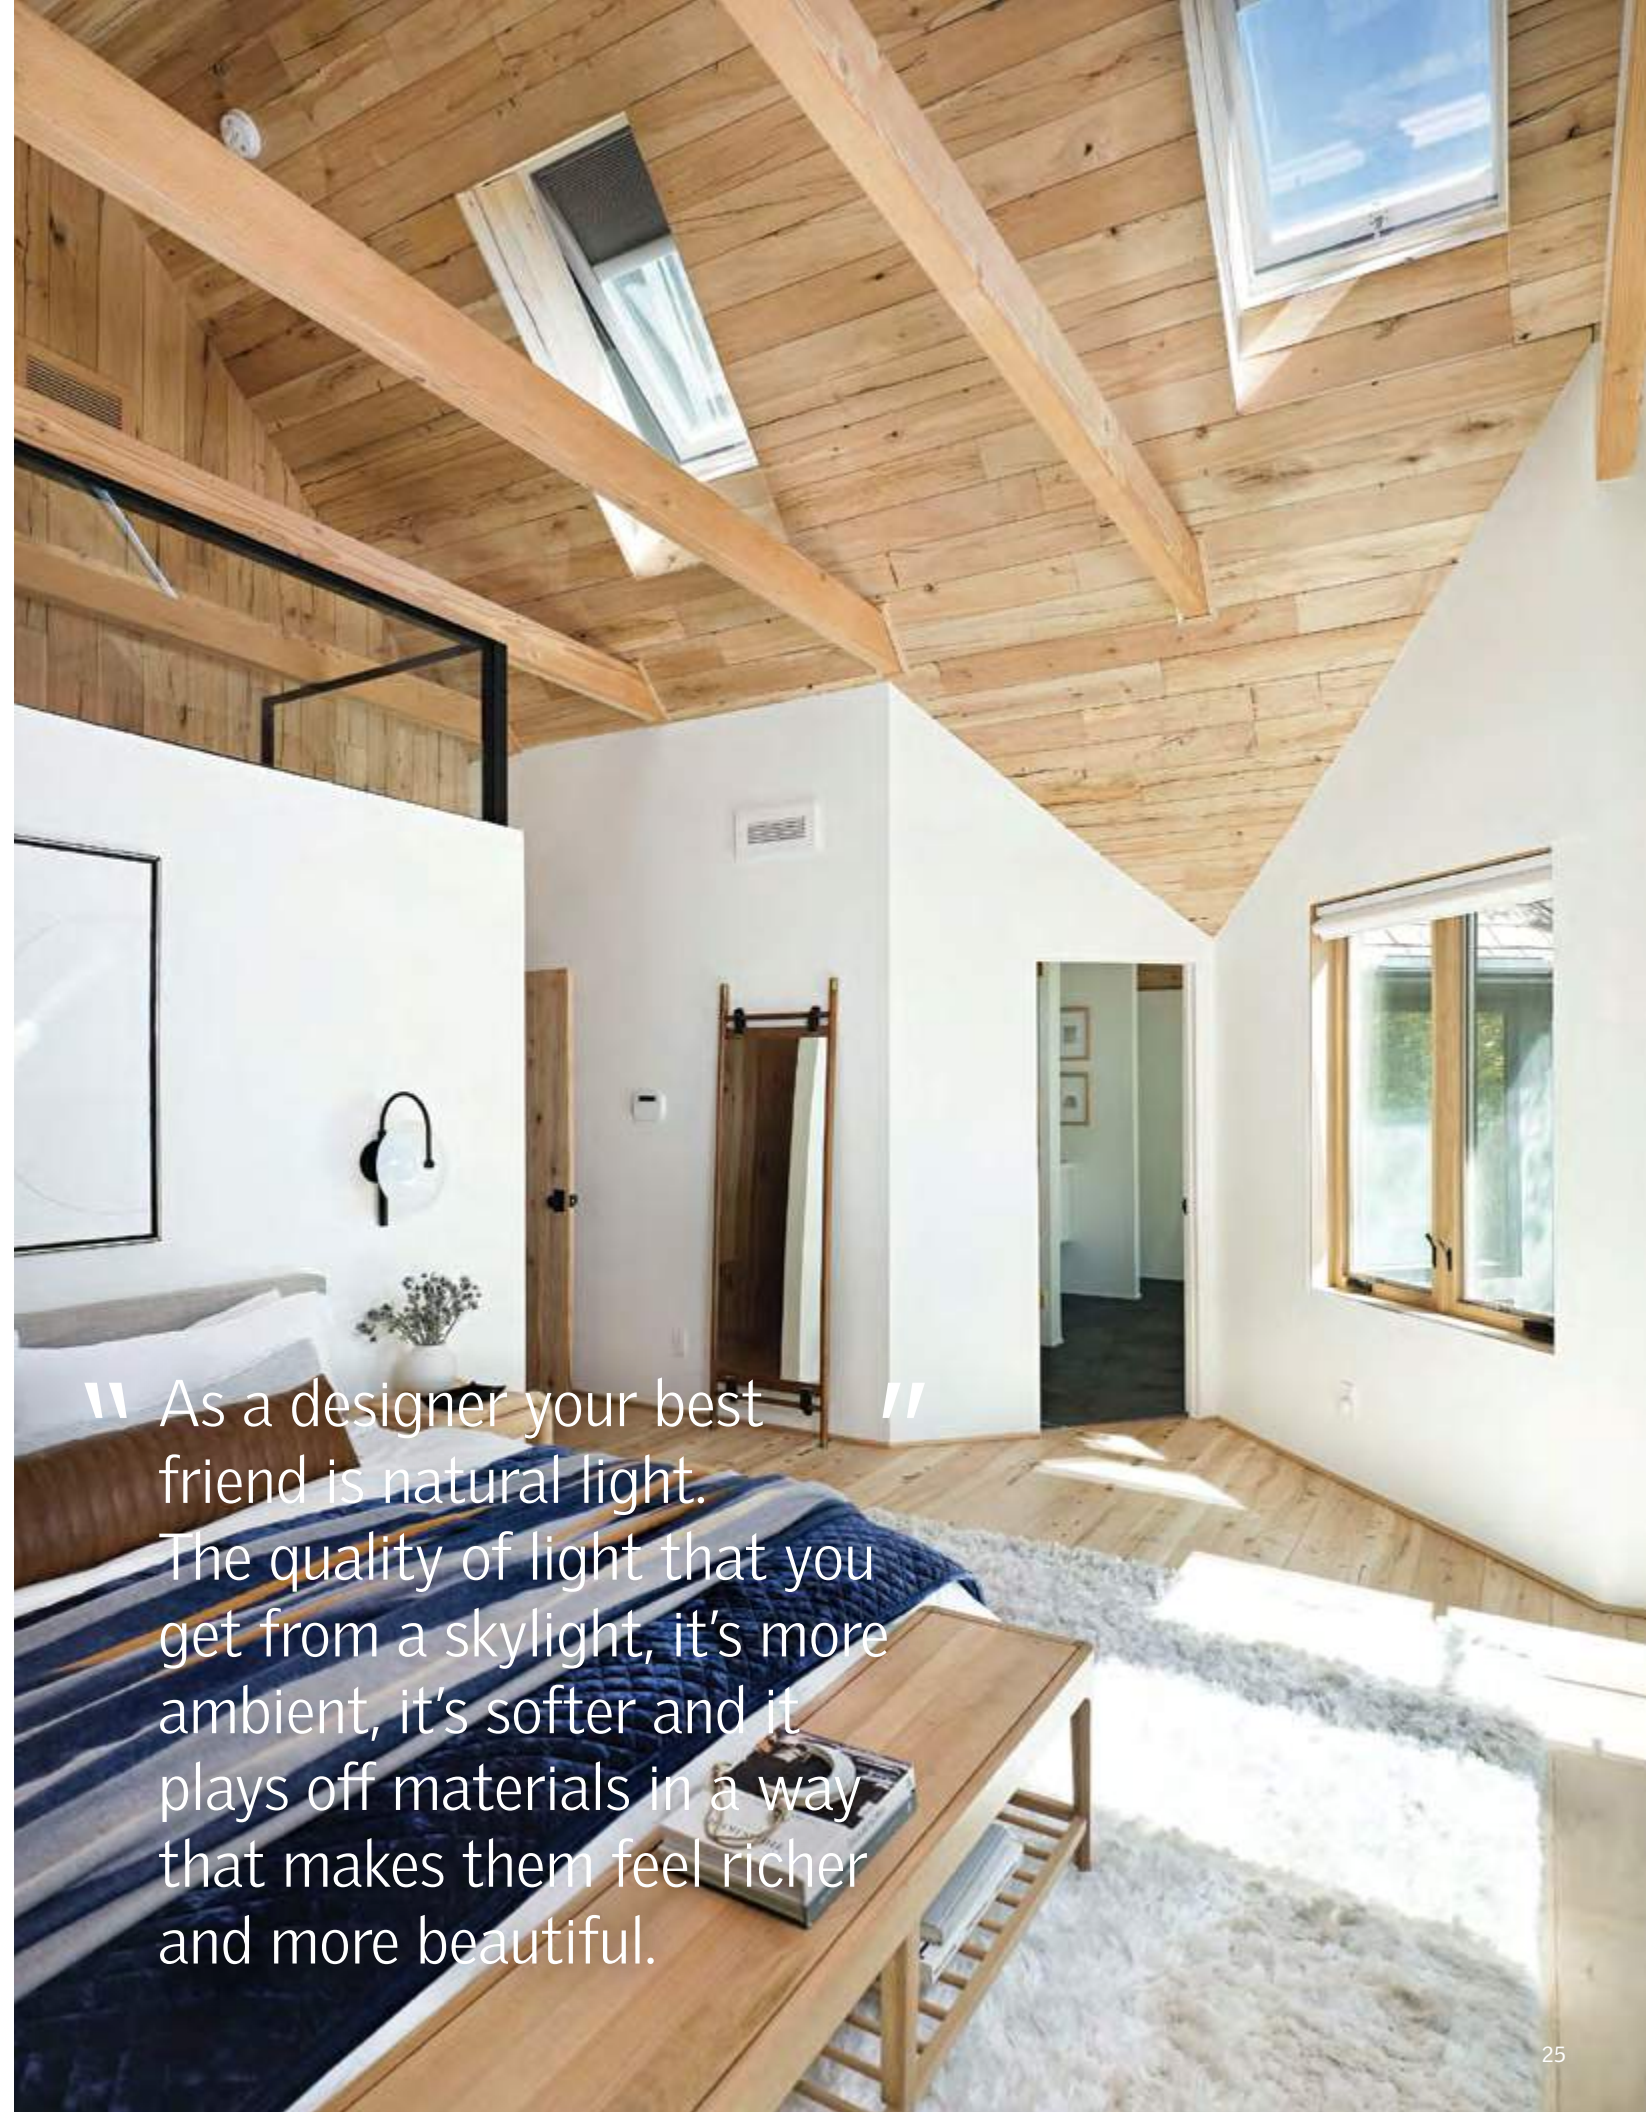

Emily Henderson

Natural Light from Above Makes This a Bedroom You'll Want To Wake Up In

Natural light from above was a key ingredient in the calm, Scandinavian master bedroom that interior design and style expert Emily Henderson created in her Lake Arrowhead mountain house. Sunlight from four VELUX No Leak Solar Powered "Fresh Air" skylights not only bathes the room in light, but brings out the color variations and grain details in the ceiling that is clad in reclaimed wood.

She can open the skylights to bring in cool, mountain air and the smell of pine trees, and fall to sleep gazing at the stars. When she wants to sleep in, she can block the light with remote-controlled room-darkening blinds.

“ As a designer your best friend is natural light. The quality of light that you get from a skylight, it's more ambient, it's softer and it plays off materials in a way that makes them feel richer and more beautiful. ”

Tessa Tillett
Indianapolis, Indiana

It's All About the Light For This Galley Kitchen

Tessa Tillett bought her first home knowing she wanted a space that brought in plenty of natural light. As a recent graduate and a freelance photographer, having natural light in her home mattered. So, with a sledgehammer in hand, Tessa completely renovated her kitchen. She added new cabinets painted deep navy blue, hung a mustard yellow sliding door into the adjoining laundry room, installed butcher block counter tops, an oversized subway tile backsplash, and added in two VELUX skylights to help brighten the space and complement the new modern design.

Before:
The rest of the house has 10-foot ceilings, but the kitchen had only 8-foot ceilings with two tiny windows. Tessa describes it as a dark space and an area she knew she wanted to spend her time renovating.

“ I’m a photographer and I’m obsessed with light and natural light especially. It was important for me to have tons of natural light coming in.”

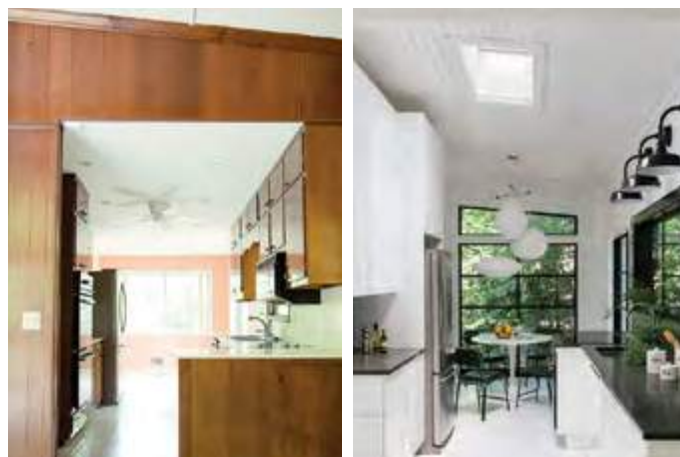

Brian Patrick Flynn
Atlanta, Georgia
Follow: @bpatrickflynn

Flynncentury Whole Home Modern Makeover

When Brian Patrick Flynn first moved into his mid-century modern ranch home, he fell in love with the mature landscaping and tree canopies outside. On the inside, however, he faced separate, privatized spaces and super dark areas. Always the designer, Brian decided to look up and focus on the home's fifth wall as much as possible. The ceilings gave him the possibility to bring in much-needed natural light, as well as high-energy hues and colors. With VELUX Skylights and Sun Tunnels®, Brian was able to lighten and brighten this diamond in the rough.

“I decided to focus on the fifth wall as much as possible, something I’d been doing since starting my career as a self-taught designer (I cannot stand a blank, flat white ceiling).”

"It's nice because we live on a busy street and so we can close the window curtains and feel private and still have the natural light."

Gorczynski Family
Lawrence Township, New Jersey

Natural Light Transforms A New Jersey's Family Living Room

After moving into their home in Southern New Jersey almost two years ago, Katie and Bryan Gorczynski faced a conundrum when it came to their dark living room. Even after swapping out a solid door for a sunshine yellow one with windows, painting the living room white, and switching the furniture around, this northwest-facing living room still felt dark. In April of 2019, a VELUX 5-Star Skylight Specialist installed two skylights in the room and now the space is bathed in natural light, even on an overcast day.

Before:

This dark living room had a large picture window with a Japanese maple tree out front that blocked most of the light coming into the room. The family adjusted the furniture layout to try to make the space feel more open. "We put the couch against the wall, even though we wanted it opposite the TV," said Katie. "When we put it across from the TV the room felt very closed off."

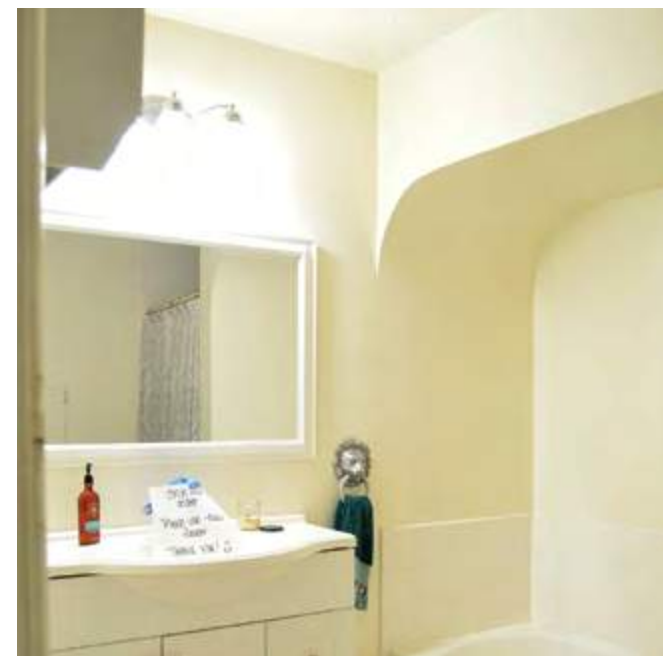

“ At first we were just awestruck at how much both structural and literal beauty it brought into the space. But after living with it for a few months we now know its true impact.”

Light and Air is a Game Changer for this Small Bathroom

Interior designer Shavonda Gardner and her family ditched their cookie-cutter, builder-grade large home for a little cottage bungalow in Sacramento, California. They were on a downsizing journey, so when it came time to remodel the home's only bathroom, Shavonda knew she would have to make bold design choices. She opted to add a VELUX Solar Powered "Fresh Air" Skylight to the bathroom to bring in ample amounts of natural light and fresh air, while allowing her to still push the envelope of design.

Before:
The home featured just one bathroom, which was an interior room with no chance of having windows added. Shavonda describes the bathroom as being dark and muggy with even a claustrophobic feeling due to the lack of outside light.

Kristen Burns and Raeann Bourscheid
Salt Lake City, Utah

Bringing Nature Inside This Master Bedroom

Before the room makeover, Kristen and Raeann’s dark bedroom had only one small window, and it seemed like the couple just hadn’t had time to get to decorating it. But in December 2018 when Kristen was diagnosed with a rare form of cancer called cholangiocarcinoma, Raeann knew Kristen needed a space that could bring her peace and happiness. The couple won a complete room makeover when they entered the VELUX Brighten Up Any Space Design Giveaway with interior design and style expert, Emily Henderson. The finished project: a haven that brings the best of nature in.

Before:
A dark space with a
small window on one
side of the room.

“ I really wanted Kristen to be able to see outside, to see the sky and the stars and feel like she had nature inside, so if she had to spend the whole day in bed she would still feel good.”

A Skylight for Every Ceiling

Flat, Vaulted, Sun Tunnel®

Have you considered installing a skylight then looked up at your flat ceiling and thought that there's just no way? You're not alone! One of the most common misconceptions about skylights is that they can only be installed in homes with vaulted ceilings. But we're here to tell you that's not the case.

Flat Ceiling

If you have flat ceilings, once your skylight is set outside, your installer will construct a drywall light shaft inside. This shaft directs daylight to the room below while hiding the attic space between your ceiling and roof.

Vaulted Ceiling

The advantage to vaulted ceilings during skylight installation is that without attic space between the roof and your home's interior, there's no need for a light shaft. So, once your skylight is installed, the work's all done.

Sun Tunnel®

The Sun Tunnel® Skylight's highly reflective and cylinder shape fits between ceiling supports, allowing light to travel from your roof down to the space below uninhibited.

3 Types of Installation

Deck-Mounted, Curb-Mounted, Self-Flashed

When it comes to skylights, there are three different types of installation methods. To know which installation is right for a home, a skylight installer or roofer will evaluate the home's roof pitch, roof material, ceiling type, and whether this is a replacement job or a new cut-in. But whatever the method, you're installing the same great skylight that brings in plenty of natural light and fresh air!

1 Deck-Mounted Skylights

Deck-mounted skylights allow for your skylight to have a low profile on your roof and create an energy-efficient installation. With this installation, your skylight is nailed directly to the roof-deck. Deck-mounted skylights are ideal for new construction homes or for brand new cut-in skylights.

2 Curb-Mounted Skylights

Curb-mounted skylights are the most common installation preference in low-pitch or flat-roof situations. The "curb" is a frame built mostly of two-by-fours that are attached to the roof. The skylight is then installed on top of the curb. You can imagine it as a shoebox: the curb is the box and the skylight is the top.

3 Self-Flashed Skylights

Self-flashed skylights differ from both deck- and curb-mounted skylights because their curb and flashing are built into the skylight. No extra flashing kit is needed. The skylight sits directly over the rough opening in the roof deck and is then sealed.

Flashing Systems

Deck-Mounted, Curb-Mounted

VELUX Skylight Flashing Kits are a crucial part of our complete system designed to shed water without relying on sealants that can break down over time. No matter the scope of your project, we offer a variety of skylight flashing systems to ensure a weather-tight fit for virtually all roof types and slopes so you can easily install the skylight of your dreams.

Deck-Mounted Flashing Systems

Each of our deck-mounted flashing systems includes a pre-attached deck seal, adhesive underlayment, and engineered flashing. They attach directly to your roof deck and interweave with the roofing material to ensure your skylight won't leak.

Shingles/Shakes - EDL

Tile Roofing - EDW

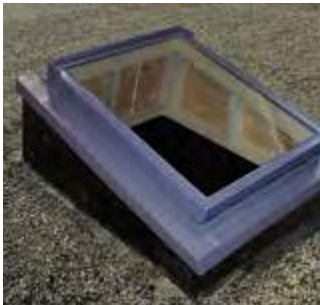

Copper Cladding & Flashing

Metal Roofing - EDM

Combi Applications

Biepack Flashing - ECB

Curb-Mounted Flashing Systems

VELUX curb-mounted flashing systems come with a pre-attached skylight gasket, which provides a tight seal between the site-built curb and skylight. When combined with an included adhesive underlayment and engineered flashing, they create a seal to ensure no water leaks around your skylight.

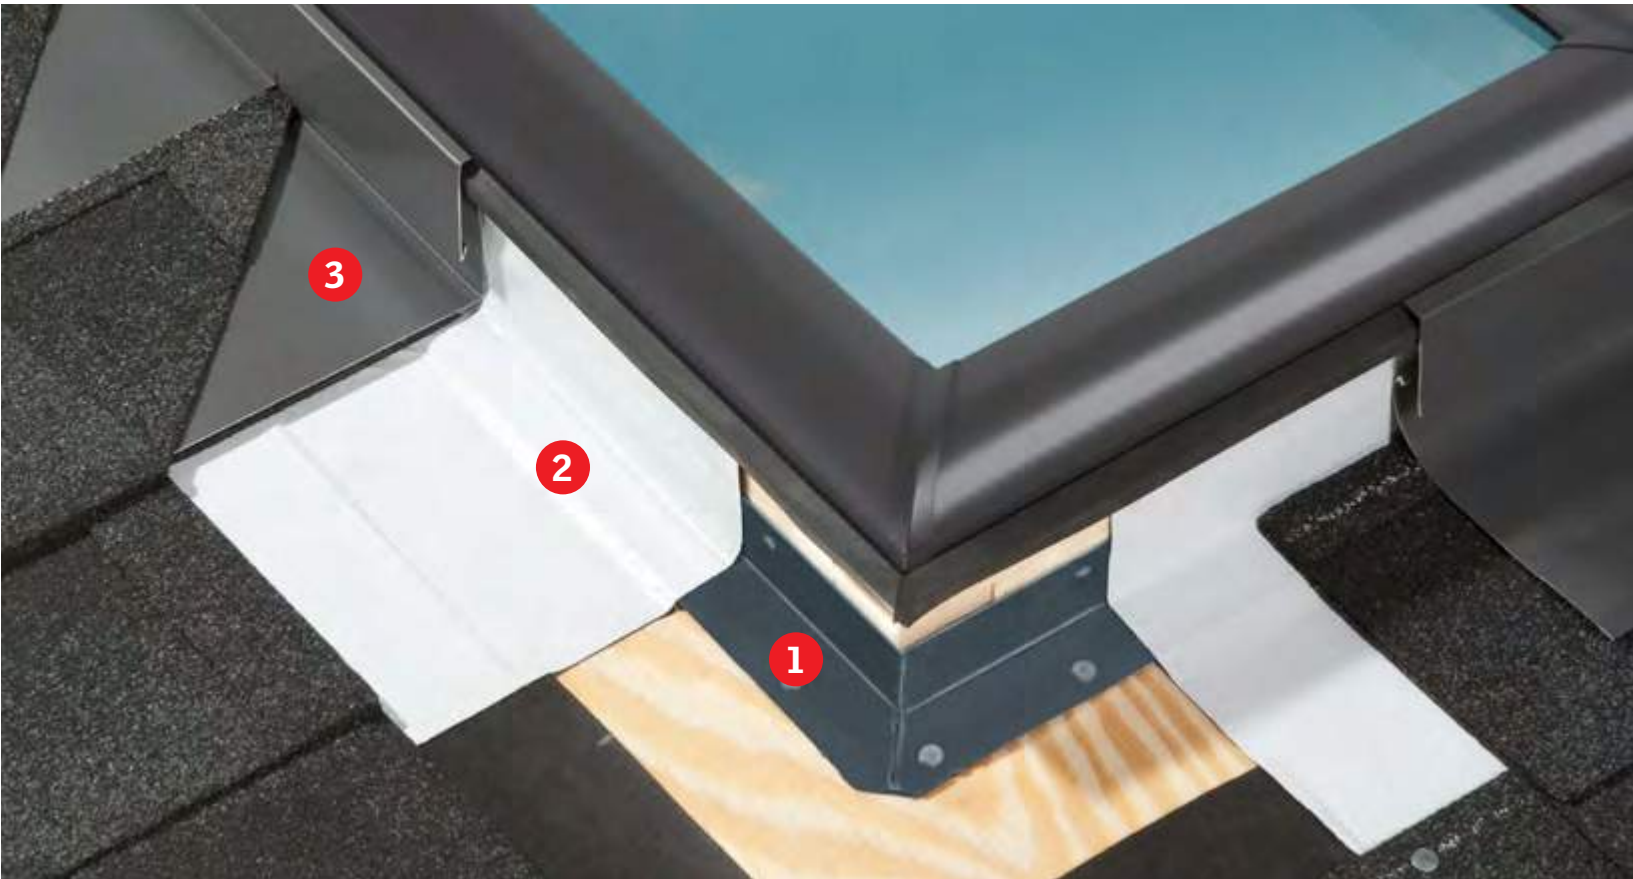

Shingles/Shakes - ECL

Tile Roofing - ECW

No Leak Warranty

3 Layers of Protection

The No Leak Promise is our guarantee to you that the VELUX skylights installed in your home will not leak. We're able to make and keep this promise with a 10-year installation warranty thanks to our patented three layers of water protection on our deck- and curb-mounted skylights.

- 1 Pre-Attached Seal**
Pre-attached deck seal (deck-mounted) or gasket (curb-mounted) provides a tight seal for leak-proof installation.
- 2 Adhesive Underlayment**
Adhesive underlayment for secondary water protection against the harshest weather conditions.
- 3 Engineered Flashing**
Engineered flashing for easy installation and primary water protection.²

Rest easily beneath your skylight knowing that, while it lets in abundant sunlight and fresh air, it will never let in rain.

Skylights

For a sleek, classic look that blends seamlessly into any roofline, VELUX Skylights open your home to a world of brighter days. Available in fixed and venting options and designed not to leak, these skylights are perfect for creating a spacious home filled with natural light and fresh air.

Skylights

Sun Tunnel[®] Skylights

Every room in your home deserves to be filled with natural light – even those in the center of your home. Unlike traditional windows and skylights, VELUX Sun Tunnel[®] Skylights can be installed virtually anywhere in your house in a single afternoon and at a fraction of the cost.

- 1 Low-Profile Appearance:** Features an extremely low-profile flat glass (the only one of its kind) that allows it to blend seamlessly into your roofline.
- 2 Highly Reflective Tunnel:** Delivers maximum sunshine from the roof to your ceiling due to the reflective material of the tunnel.
- 3 Versatile Design:** Fits between rafters and around other obstructions in your attic, allowing the sun tunnel to be one of VELUX's most versatile skylights.
- 4 Additional Lighting:** Whether you're looking for a moon-like nighttime glow or want to flip a switch for light at any time, add any of our lighting control options to your sun tunnel. For additional light, day and night, opt for the Solar Night Light, Daylight Controller, or Electric Light kit.
- 5 Ceiling Ring and Frosted Diffuser:** Add a decorative, modern flare to your room while softly diffusing the natural light pouring in.

Sun Tunnel® Skylights

- Versatile, highly reflective tunnel carries light from the roof to the space below uninhibited
- Compatible with multiple diffuser options to finish the look of a room
- One of our fastest, least expensive ways to transform a room with daylight
- Go Solar with the Solar Night Light for rigid tunnels to receive a federal tax credit on product and installation¹

ENERGY STAR®

One of the most straightforward ways to help meet energy codes as a builder or architect, while still designing bright, airy buildings, is to specify ENERGY STAR® certified products.

Most VELUX residential products are ENERGY STAR® certified in all 50 states, which means they meet energy efficiency standards set by the US Environmental Protection Agency (EPA). In order to be ENERGY STAR® certified, fenestration products must have their U-factor, Visible Transmittance, and Solar Heat Gain Coefficient ratings independently tested and approved under the FenStarSM Certification Program of the National Fenestration Rating Council (NFRC) to qualify.

By using ENERGY STAR® certified products, architects and builders can use skylights to bring much needed daylight and fresh air inside, allowing them to create more attractive buildings and more livable spaces while still meeting local energy codes.

In warmer climates, there is great potential for lighting energy savings by using emerging control technologies like VELUX ACTIVE or more effective daylighting products like VELUX skylights with blinds and Sun Tunnel® Skylights.

Code Compliance

VELUX offers a broad array of skylights, roof windows, and sun tunnels that meet the applicable performance requirements and testing and labeling standards written into the most current US Model Codes:

- 2018 IBC (International Building Code)
- 2018 IRC (International Residential Code), and
- 2018 IECC (International Energy Conservation Code),
- As well as local and regional codes based on the above codes.

Additionally, electrical components built into VELUX products are UL listed.

Standard VELUX residential skylights and sun tunnel products also meet or exceed applicable Powersmart requirements, in addition to those of the current and prior North American Fenestration Standards (NAFS), also known as AAMA/WDMA/CSA 101/I.S.2/A440. Copper-clad versions may not exceed these requirements but do meet other standards required of them.

To verify these attainments on-site, the products are shipped with all required labels to expedite the inspection and final acceptance process. VELUX confidently certifies through these labels that only products consistent with the tested specimens are sent to the job.

Warranty

For over 75 years, VELUX has been dedicated to producing skylights that are synonymous with quality and reliability. Our commitment to you does not end once your skylight is installed.

The VELUX deck- and curb-mounted product family is designated as "The No Leak Skylight." It carries a 10-year installation warranty, plus 20 years on glass seal failure, 10 years on product, and 5 years on blinds and controls.

This limited warranty does not apply to VELUX products purchased prior to January 1, 2010.

¹ For the most up-to-date Federal Solar Tax Credit information, visit veluxusa.com/go-solar.
² To qualify for the VELUX 10-year installation warranty, VELUX flashing must be purchased. The 10-year installation warranty excludes EVMS, EV, QPF, EF.
³ VELUX blinds are not available for any VELUX custom-sized skylights. VELUX blinds when purchased with a standard size accessory tray are available for select E-Class skylights.

NOTICE: ALL GLASS MAY BE SUBJECT TO UNEXPECTED AND SPONTANEOUS BREAKAGE in rare circumstances due to imperfections in the glass that are undetectable during the manufacturing and inspection process by the manufacturer of the glass and VELUX.

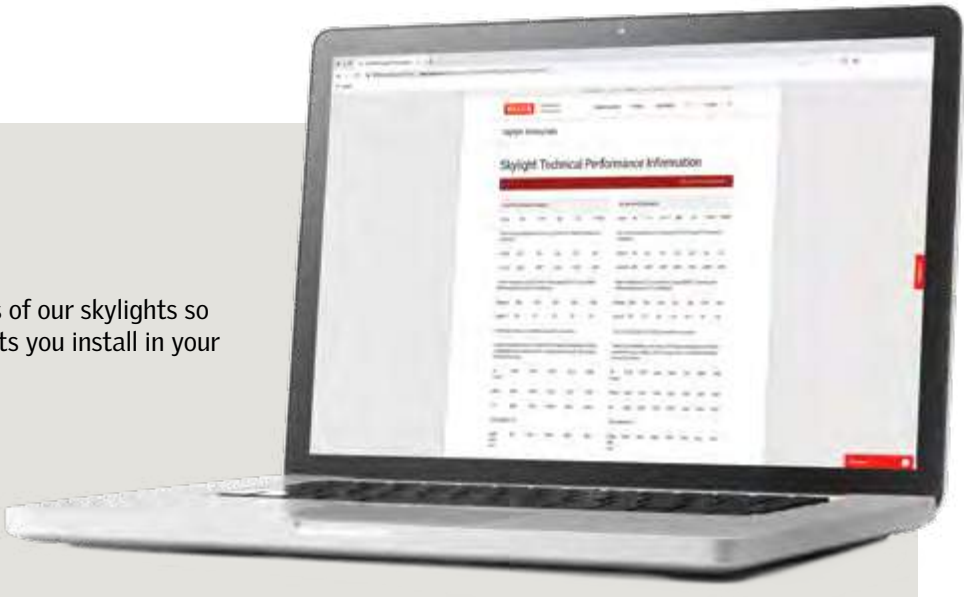

VELUX offers the choice of laminated or tempered glass skylights. Impact glass and comfortplus glass are all types of laminated glass. Comfort glass is a type of tempered glass. Laminated glass is a combination of two or more glass sheets with one or more interlayers of plastic (PVB) or resin. In case of breakage, the interlayer is designed to hold the fragments together. Tempered glass does not contain an interlayer to hold the fragments together. Instead, tempered glass is designed to break into small, pebble-like pieces. When tempered glass breaks, pieces of glass come loose and may strike an individual.

CONSULT LOCAL REGULATIONS AND/OR BUILDING MATERIAL CONSULTANTS TO DETERMINE WHICH TYPE OF GLASS IS RIGHT FOR YOU OR IF LAMINATED GLASS IS REQUIRED IN YOUR APPLICATION.

All VELUX skylights, roof windows, Sun Tunnel® Skylights, flashing kits and blinds must be purchased through a qualified VELUX dealer. Please see the "Where To Buy" section of veluxusa.com website for a list of VELUX dealers near you.

The VELUX Group creates better living environments with daylight and fresh air through the roof. The VELUX product program contains a wide range of roof windows and skylights, along with solutions for flat roofs. The Group also supplies many types of decoration and sun screening, roller shutters, installation products, and products for remote control for installation in roofs. The VELUX Group, which has manufacturing companies in 11 countries and sales companies in nearly 40 countries, represents one of the strongest brands in the global building materials sector and its products are sold in most parts of the world. The VELUX Group has about 10,000 employees and is owned by VKR Holding A/S, a limited company wholly owned by foundations and family. For more details, visit velux.com.

VELUX rigorously tests the materials of our skylights so that you can rest assured the products you install in your home are safe.
