Doors of Epic[®] Proportions

When you select or specify Epic doors and commercial hardware, you choose impressive functionality.

Doors of Epic proportions need hardware that can keep pace with size and performance. JELD-WEN's commercial hardware not only measures up but also delivers the options you need for institutional and commercial applications.

Many colors and options provide ample opportunities for a distinctive look and feel for your project, and JELD-WEN's accompanying commercial hardware will not let you down. So no matter which beautiful interior wood finish options or tough exterior metal cladding options you choose, JELD-WEN has hardware that complements the look without compromising the security and functionality of the entry. Concealed rod hardware hides the locking mechanism in the stile of the door, so your client sees the door and not its workings.

We also back these products with industry-leading support. Whether you're looking for architectural information to help you specify the product or you need a consultation with a JELD-WEN representative, we have resources in place to assist you every step of the way.

AuraLast® Wood protects against wood rot for as long as you own and occupy your home. Guaranteed.

Guaranteed Protection Against Wood Rot

JELD-WEN Wood Windows and patio doors made with exclusive AuraLast Wood are guaranteed not to rot for as long as you own and occupy your home. Wood components made from AuraLast wood maintain their structural integrity even in the toughest climates.

100% PROTECTION

Surface To Core Protection

Because of our vacuum/pressure process, AuraLast Wood provides virtually 100% penetration of the protective ingredients. Other manufacturers use submersion/dip-treatment methods, which only protect the outer surface of the wood.

100% WOOD

Working With AuraLast Wood is Easy

AuraLast offers the strength and beauty of real wood because it is real wood, not a composite. AuraLast Wood is colorless, stainable and odorless.

Virtually 100% Surface to Core Protection

100% WORRY-FREE

AuraLast is Safe

AuraLast Wood is made by using a water-based solution to deliver the effective ingredients to the core of the wood. Traditional dip-treatments use a solvent-based chemical bath. During production our AuraLast process releases 96% fewer volatile organic compounds than the traditional dip-treatment method.

Traditional treatments only protect the outer surface

A JELD-WEN Exclusive

Only JELD-WEN makes window and door products with natural pine AuraLast Wood.

Protects Against Water Saturation

AuraLast Wood offers superior resistance to water saturation, which protects against swelling that causes windows and doors to stick.

Protects Against Termites

Harmful termites will eat through unprotected wood—not so with AuraLast Wood.
