

# INTERIOR DOORS

BROCHURE

**(2) 15 Lite True Divided**  
Primed French Door  
Finished in Field

# DOOR TYPES

## Flush Doors

Common, inexpensive and easy to paint or stain, flush doors are stocked in Primed Hardboard, Red Oak, Birch, and Imperial Oak. They are available in hollow or solid core, unfinished or prefinished, and have optional lites and louvers. Special order species are also available

## Molded Doors

Molded door skins are made by combining fine wood fibers and resins and then "stamped" into a variety of raised panel designs. Their popularity is due to their value – you get a great looking door for a great price. Molded doors are available in smooth or woodgrain, hollow or solid core and represent one of the best "bang for your buck value" in the industry.

## Did I Choose the Right Door?

It really comes down to your taste and budget.

Fortunately, MMI DOOR inventories a huge selection for any budget that is available to you within 7-10 days!

If you have more time, our extensive special order options are available to you within 3-6 weeks.

## MDF Doors Medium Density Fiberboard

MDF doors are an affordable step up from solid molded doors. They offer a smoother, denser skin (MDF) that results in a higher quality finished product when painted. Most MDF doors are solid core. Design and sizing possibilities are endless in this category which adds to its popularity.

## Panel Doors Raised Panel, Flat Panel & French

Multiple designs, species and glass options define the top end of the interior door category. Though some wood species can be painted, the majority are stained to showcase their attractive wood grains.

Available in-stock species include Pine and Oak

# CHOOSE YOUR DOOR

## 7 EASY STEPS TO CHOOSE YOUR NEW INTERIOR DOOR

Interior doors have become an intricate part of home design and adding or upgrading the doors in your home can increase your home's value. This has raised the interest for more options, functionality and an improved quality of life. With all the options on the market today, choosing an interior door can be an intimidating process.

MMI DOOR has developed a step-by-step system below to help guide you in the right direction.

### 1 Functionality

This is a critical planning stage, use it wisely. Every opening doesn't require the same door.

- Examples:
- A) French doors (single or double) can provide light to an adjoining room while maintaining privacy
  - B) Solid core doors look the same on the outside but contain sound reducing material on the inside. Great for bathrooms, game rooms, music rooms, bedrooms, offices, etc.
  - C) Mirrored doors on a bedroom closet or bathroom door saves space, enlarges the room and creates additional reflective light
  - D) Doors with frosted glass provide extra light without sacrificing privacy
  - E) Barn doors combine style and practicality while transforming your space to complement the modern home

### 2 Choose a Door Design

Flush contemporary, traditional colonial or something totally unique? The choices are immense. This is your home - Make it your own!

# CHOOSE YOUR DOOR

3

## Are You Painting or Staining?

This decision will narrow your choices:

**Consumer Tips:**

- A. Painting is quicker, less expensive and easy to change. Staining is the opposite but will produce dramatic results.
- B. If painting – Primed Panel, Molded and MDF doors are your choice. If staining – Wood Panel or Flush doors are your choice.
- C. Don't be afraid to paint the door and stain the trim or vice versa. It's happening everyday!

Pine      Knotty Alder      Red Oak      Cherry      Maple      Birch      Mahogany      MDF      Primed

4

## Choose Your Door Jamb

**Consumer Tips:**

- A. If painting – choose primed.
- B. If staining – select the same species with a grain that either matches or most closely matches your door as related on page 21. We have a variety of jamb species to accentuate your door. Get the wow factor going. Don't be afraid to finish the door and trim differently. See examples throughout this brochure.

5

## Choose Your Hinges

Hinges are a decorative item too! Match the hinge finish with the overall hardware theme of your home. This includes locks, light fixtures and decorative accents. Upgrade to Ball Bearing Hinges for added durability. These hinges are engineered for the smoothest and quietest door operation. Available on solid core doors only.

### Round Ball Bearing Hinges

US-3/4 Lite Brass      US-5 Antique Brass      US-3 Bright Brass      US-26 Bright Chrome      US-26D Dull Chrome      LUS-15 Dull Nickel      US-15A Antique Nickel      US-10BD Colonial Bronze - Dark      US-19 Flat Black      US-P White Primed

### Square Ball Bearing Hinges

US-3 Bright Brass      US-10BD Colonial Bronze - Dark

### Self-Closing Hinges

US-15 Satin Nickel

6

## Sizing

Confirm the size of every opening – width and height. This includes the door as well as the “wall width” of the jamb.

7

## Place Your Order!

Please Note: Availability varies by location.

# HOLLOW & SOLID CORE MOLDED DOORS

## MOLDED DOORS

When you want plenty of options, select interior molded wood fiber doors. These doors are created in several styles, panel designs and sizes.

Single and double doors can be ordered as ready-to-install prehung units in a wide variety of sizes, jamb species and decorative hinge finishes.

## THE MILLENNIUM COLLECTION®

The Millennium Collection® consists of four distinct door products that each fit a specific demand in the world of design and construction. *Encore*, *Ovation*, *Infinity*, and *Bravo* Doors are manufactured of renewable composite wood fiber materials for stability and reliability. Our state-of-the-art process and environmentally friendly construction techniques mean endless flexibility for your architectural design. Below are some samples of our standard designs:

### *Encore* ROUTER CARVED DOORS

- Dramatic raised panels or grooved options
- Traditional molding profiles
- Made in the USA by proud American craftsmen
- 152 Designs Available

### *Ovation* LAYERED PANEL DOORS

- Uniquely layered construction
- Environmentally friendly substrate that will not split or warp
- Made in the USA by proud American craftsmen
- 142 Standard Designs Available

### *Infinity* INLAID MOLDING DOORS

- Features dramatic raised panels
- Detailed inlaid molding profiles: Raised, Flush, and Plant-On
- Made in the USA by proud American craftsmen
- 138 Standard Designs Available

**SPECIAL ORDER**  
Available in 3-6 Weeks

# THE MILLENNIUM COLLECTION®

*Bravo*

## TRADITIONAL STILE & RAIL DOORS

- Crisp detailed miters and profiles
- Architecturally correct panel configuration
- Made in the USA by proud American craftsmen
- 51 Traditional Designs Available

4 Panel Bravo® Door  
Finished in Field

Below are more door styles we have to offer.

Styles shown in Encore®. Also available in Ovation®, Infinity®, and Bravo®

  - MDF top and bottom rails optional
  - 1/8" HDF facings
  - 1-1/4" wood top and bottom rails in customer specified widths

## INSIDE EACH MILLENNIUM DOOR

### The Finish:

Each door is individually finished with a UV sealer system. Applied before the finishing coat, seals the wood, removing all traces of cracks and crevices in the joints and tones down brush strokes, knots and woodgrain

### Tenon & Mortise Joint:

High quality construction with an adhesive binding technique that gives the joints exceptional strength and a lasting hold

### Panels:

Medium Density Fiber panels are incorporated in each panel for a stable door, resistant to expansion which helps to protect from cracks and leaks

### Interior Handings

## Door Openings

NOMINAL DOOR SIZE	SINGLE DOOR WIDTH						DOUBLE DOOR WIDTH*						HEIGHT

\*Double door unit dimensions shown are for units with ball catch only. For double door units with an astragal, add 1/2" to width.

# CARE, FINISHING AND WARRANTIES

The care and finishing of your new interior doors should be taken very seriously. Though these suggestions may sound basic, most damage to interior doors is caused by improper, careless handling.

- Wood doors should be treated like fine wood furniture.
- Doors stored for more than a few days should have the top and bottom rails sealed. Do not drag doors or walk on them.
- Single door slabs (not prehung doors) should be laid flat on a dry, clean surface.
- Do not subject them to extreme or rapid changes in humidity or heat.

## FINISHING

Proper care and finishing are very important to gain the maximum benefits from your interior doors. If done right, a correctly applied finish will help you achieve a longer lasting, higher quality product that exceeds your aesthetic and operational expectations. Below are a few key points everyone should know when it comes to the care and finishing of interior doors.

- All doors have six sides - not two, not four, but six – front, back, two edges, plus the most ignored and most vulnerable, the top and bottom. Failure to finish all six surfaces uniformly is the number one cause of door failures.
- No finishing process exists today that totally eliminates the transmission of water vapor or moisture into and out of wood doors. The key to proper finishing is to slow down the transmission process so the door performs within tolerances.
- Sanding is a critical component of any finishing process. All doors may have visible and invisible blemishes from handling or other natural occurring characteristics. Sanding techniques vary by door type and must be followed to achieve a quality finish.
- Natural wood doors (pine, poplar, oak, etc.) contain color, tone and graining variations that occur in the natural process. Application of a pre-stain wood conditioner promotes a uniform appearance and minimizes sharp color contrasts. Carefully follow manufacturer's instructions for wood conditioner application.
- Oil based products are recommended for interior wood veneered doors. Water based products can raise the grain and cause multiple moisture related problems. Latex or oil based paint is suitable for interior molded doors.

For more detailed information, please refer to the manufacturer's care, finishing and maintenance directions located on our website – [www.mmidoor.com](http://www.mmidoor.com)

## WARRANTY

At MMI DOOR, interior doors are produced to exacting standards, regardless of the manufacturer. Based on decades of superior performance, we warrant our interior doors from defects in material or workmanship for a period of 5 years when they are:

- Properly installed
- Properly finished (paint or stain)
- Properly cared for and maintained
