

TRUSTILE®
A MARVIN® BRAND

TRUSTILE WOOD ENTRY SYSTEMS
DESIGN THAT MOVES YOU™

See page B30 for product specs.

THE TRUSTILE STORY

Since 1995, TruStile has put design at the center of our products and processes. From the materials we select to our exacting craft and design, we engineer for quality that sets the tone for the whole home. In collaboration with our parent company, Marvin™, we have created a family of premium entry systems that don't just transform a space, but how you feel inside it. Make the entry to your new home a most welcoming invitation with an exceptional entrance by TruStile.

TRUSTILE ENTRY SYSTEMS MATERIAL CONSTRUCTION

Resilient™ Wood Entry System

The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable painted construction without sacrificing any design options.

- Engineered with resilient Accoya®, an acetylated wood product, which brings unprecedented reliability and durability to wood.
- Tricoya® top layers provide exceptional stability, durability and paintability for outdoor applications.
- Most configurations delivered pre-hung with a premium prime finish that's ready to paint.
- 10-year warranty with limited and no overhang applications, depending on system design specifications.

Choose the Material Best Suited for Your Project

Both material construction options have been extensively tested and proven in partnership with the Marvin™ Research and Development team.

Reserve™ Wood Entry System

The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

- 10 natural wood species available with an extensive collection of premium factory stain options.
- Premium appearance standards ensure industry-leading grain and color matching.
- Engineered with a laminated veneer lumber (LVL) core and Tricoya® layers for exceptional stability and durability.
- 5-year limited warranty with industry standard overhang requirements.

TRUSTILE ENTRY SYSTEMS

TWO WAYS TO CREATE YOUR ENTRY SYSTEM

Start designing at
www.trustile.com/designtool
Details on page 88.

Select From Our Featured Entry Systems

We've created over 80 featured entry systems that capture the current trends of popular architectural styles. Start with the style most closely matching your vision for your home and tailor it to match your tastes and requirements.

Or Build Your Own Entry System

Design your custom entry system in a few simple steps. Choose the right material for your project. Select from over 500 door styles and endless design options. Then finalize the details to your exact specifications.

Resilient™ and Reserve™ Wood Entry Systems Construction

In collaboration with our parent company, Marvin™, we have engineered a family of premium entry systems that don't just transform a space, but how you feel inside it.

TruStile Entry Systems have been extensively tested and proven in partnership with the Marvin™ Research and Development team.

Reserve™ Wood Entry System

Resilient™ Wood Entry System

Wood Performance Every Home Can Rely On

Learn more about the innovative, durable materials used in making our entry systems.

As the sister brand to Accoya®, Tricoya® is an acetylated wood panel product that achieves the same ultra-high levels of durability and stability in the most extreme and challenging climates and outdoor applications. Tricoya is used as a stable core material within the Reserve™ Wood Entry system and a durable, paintable surface layer of our Resilient™ Entry system.

- Doesn't shrink or swell like other wood products
- Superior paintability and consistent surface across the entire door
- Complies with CARB 93120 for No Added Formaldehyde

Accoya® is an acetylated, modified wood product that is unsurpassed when it comes to durability, stability and withstanding the test of any climate.

As part of the TruStile Resilient™ Entry System, Accoya® is used for the core and frame components for durability, stability, and superior rot resistance.

- Doesn't shrink or swell like other wood species
- 100% real wood. A sustainable and durable material
- Solid wood core provides superior screw holding on door edge

So, What is Acetylation?

Acetylation is a process used to enhance the naturally-occurring properties of wood. In simple terms, it 'pickles' the wood, reducing how much water the cells in the wood can absorb.

It does this without adding toxic chemicals to the final product, but by boosting the concentration of 'acetyl groups' — which are already found naturally in trees and their wood.

More specifically, the process uses acetic anhydride to change hydroxyl groups (which like water) into acetyl groups (which don't like water), resulting in improved performance characteristics without introducing harmful or environmentally unfriendly additives.

Altogether, this means the wood shrinks and swells much less when wet, and is much less susceptible to decay or insect attack. The finished product is highly durable and dimensionally stable, outperforming all known species of wood.

Cherry

Douglas Fir (*Vertical Grain*)

Select Alder

Walnut

Plain Sawn White Oak

Quarter Sawn White Oak

Rift Sawn White Oak

Clear Pine

Paint-Grade Mahogany and Paint-Grade Douglas Fir not shown.

Stain Options

TruStile uses stains from ICA, a leading European finish manufacturer, for factory-finished entry systems. We begin by applying either a clear or tinted base stain with UV inhibitors (unfinished doors also get this base coat). Then a total of five coats of finish are applied. This includes two seal coats and three topcoat layers of finish giving a robust dry film finish thickness. Slight color and sheen differences might occur between interior and exterior finishes.

	Amaretto	Bleached	Cameo	Cappuccino	Caramel	Champagne	Cinnamon	Ebony	Espresso	Grey Mist	Hazelnut	Honey	Nutmeg	Slate	White Haze
Mahogany															
Cherry															
Clear Pine															
Douglas Fir															
Select Alder															
Walnut															
White Oak															

For White Oak: Choose rift sawn, plain sawn or quarter sawn. Plain sawn White Oak shown.

The color of the finish can vary depending on the color of the wood, lighting on the job site, and natural exposure to oxidation and sunlight. To get the best example of the stain color on a specific species, please visit your TruStile dealer.

Hinge Options

Choose from ten standard hinge finishes or select an option from Emtek® or Baldwin®.

Industry-Leading Warranty Coverage

TruStile Wood Entry Systems come backed with industry-leading warranty coverage. Door systems that are factory finished by TruStile are warranted to be free from manufacturing defects for 5 years from date of purchase for the Reserve™ Wood Entry System and 10 years from date of purchase for the Resilient™ Wood Entry System depending on application and specifications. Door systems purchased raw and unfinished are warranted to be free from manufacturing defects for 3 years from date of purchase. Due to its aging characteristics, Alder door systems are warranted for 1 year from date of purchase. Please see trustile.com/warranties for specific detail warranty information for each product.

Requirements for Warranty Coverage

Your TruStile Entry Door should be viewed as a piece of well-engineered fine furniture. Careful steps have been taken to design the product to perform in proper exterior openings. However, finishes and natural wood both weather and break down over time. This weathering process increases with greater exposure to the elements. TruStile Wood Entry systems, like those sold by other manufacturers, require proper overhang protection to meet warranty requirements (see diagram below for details). Proper overhang helps to protect both the finish and the natural wood from moisture and UV damage. Even with proper overhang, the topcoat of any stained natural wood door must be inspected annually and reapplied during early signs of fading. Maintaining the topcoat will maximize the life of your natural wood door and is also required to maintain TruStile warranty coverage.

Overhang Requirements

Standard Overhang

Required for Reserve™ Wood Entry System warranty coverage

Reduced Overhang

Required for warranty coverage on:

- Resilient™ Wood Entry System with sidelites and/or transoms
- Resilient™ single and pair units with oak adjustable sill
- Resilient™ pair units without multi-point locks

No Overhang Required

Warranty coverage available for Resilient™ single and pair units meeting the following:

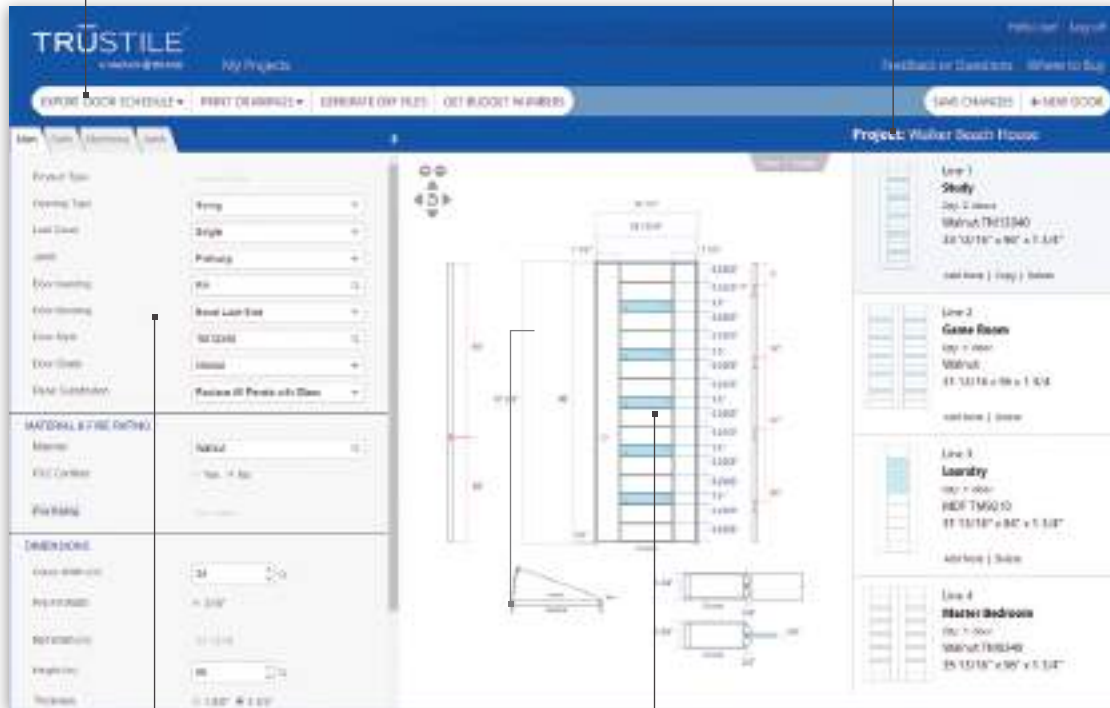

- Hydrosill™ required
- 3'6" × 8'0" maximum single door width
- 6'0" × 8'0" maximum pair width
- Multi-point lock required for no overhang coverage on pairs

Door Design Tool

Configure multiple doors and organize them by project.

Export door schedules, drawings or CAD files to import into your plans

Create multiple doors and organize them by project

Over 500 door styles to customize to your needs — available as interior or exterior, pre-hung units or slabs.

An accurate preview is continually updated as you make changes to your door design.

Share Your Project with Other Apps

Door Design Tool projects can be exported as a door schedule that opens directly in Microsoft® Excel, as a PDF of drawings or CAD models to import directly into your plans.

www.trustile.com/designtool

TruStile's exclusive web-based software allows you to design your own custom doors. Specify the height, width and location of all components within a door.
