

MASONITE®

INTERIOR DOOR

Selection Guide

Introducing Bayshore

TRADITIONAL LINES, MODERN-DAY ENGINEERING

The molded panel Heritage Series® Bayshore 5-Panel Door seamlessly blends innovative design with contemporary style, effortlessly complementing any decor. Unlike traditional shaker-style doors with a typical panel profile angle of 90 degrees, our Bayshore features a distinctive panel profile angle that reduces dust accumulation in hard-to-reach corners and minimizing paint build-up, thereby simplifying the painting process.

- Solid core door is made with more sound-dampening material than our standard hollow core door for better sound control.
- Constructed with more material to better resist warping, shrinking, and cracking.
- More substantial than hollow core doors, our solid core doors have quality and strength you can feel.
- Available as a fire-rated door.
- Available as an ADA door.

46033-19

MASONITE®

Masonite is built on a 100-year history of innovation and sustainability. We proudly manufacture our doors using renewable natural resources to be better stewards of our planet. We thoughtfully design our selection and purchase processes to provide a best-in-class customer experience. We strive to deliver on these promises — every time.

We are on a mission to make life better as we elevate the “everyday door” into something extraordinary. We create beautiful, durable exterior and interior Doors That Do More™ in a curated portfolio that fulfills human needs for comfort, safety, security, and convenience so that people can rest, learn, work, and live more comfortably.

As we enter our next century, we will continue to ask what more can our doors do to make life better?

The Solid Core Difference

Solid core interior doors are made with 70% more material than our standard hollow core doors, providing premium quality you can feel when opening and closing them.

70%
more

sound-dampening material
than our standard hollow core doors

**MASONITE
HOLLOW CORE DOORS**

5-YEAR WARRANTY

**MASONITE
SOLID CORE DOORS**

7-YEAR WARRANTY

Our solid core doors are made with more recycled material than our standard hollow core doors, too, for more mindful utilization of resources. And they're built to last — backed by a 7-year limited warranty.

These stronger, heavier doors enhance durability throughout a home. And their added density means they also reduce the transmission of noise, allowing you to keep the sound made in one room out of others.

Make Solid Core The Standard

Doors Designed to Be Different

We know that homes take a beating — and that they can be noisy too, which is why our durable, sound-dampening solid core doors are built for real life. Set a new standard with solid core, a sound-dampening solution that reflects the quality of the homes you build. These interior doors are more durable and less likely to warp over time, resulting in fewer callbacks. Homeowners will be able to see — and feel — the difference.

SOUND + PRIVACY + QUALITY

The **Premium** Home Standard

Build consistency throughout the home with high-quality doors that look great and feel substantial.

Areas to consider:

- Bathrooms
- Bedrooms
- Closets
- Utility Room
- Laundry Room
- Home Office
- Pantry
- Media/Game Room

The Step-Up Home Standard

SOUND + PRIVACY

Create quieter spaces for work and rest by using solid core doors to keep sound out of rooms. They enhance privacy as well.

AREAS TO CONSIDER:

Bathrooms
Laundry Room
Bedrooms
Home Office

The Starter Home Standard

SOUND

Install solid core doors to keep sound contained in some of the noisiest rooms of the house. Solid core also adds quality and durability to high-traffic areas.

Masonite Interior Wood Doors

Made from real wood, Masonite interior wood doors make a lasting impression. Nothing compares to the beauty and warmth of natural wood. Available in a wide variety of wood species, wood doors can be customized to fit your style. The glass panels help open up the space and allow more light to flow seamlessly throughout your home.

A selection of our wood door options is shown.

To see all of our wood door options, please visit masonite.com/wooddoors.

Wood Options

From the rich elegance of walnut to the rustic charm of knotty pine, we have the wood species to achieve the look that defines your style. Choose from 19 stain-grade species or expand your options by having your door primed and ready to paint.

* ADA compliant 10" bottom rail.

† Standard bore machining (2-1/8" diameter) requires a stile no less than **3-11/16"** to accommodate a **2-3/8" backset**.

▲ Standard bore machining (2-1/8" diameter) requires a stile no less than **4-1/16"** to accommodate a **2-3/4" backset**.

**Narrow outside stile could restrict handle set options.

Note: 48", 60" and 72" bifolds are achieved by doubled 24", 30" and 36" bifolds (has 4 pieces).

Note: West End Collection is not for use with double doors.

Please note that some sizes are only available as a result of being trimmed from a larger facing. The trimming process may result in a stile width that is too narrow to accommodate a standard bore. To machine a standard bore with a 2-3/8" backset on the lock hole and a 2-1/8" diameter bore, the outer stile measurements must be no less than 3-7/16" wide. Many facings have a lockrail that will accommodate a standard bore even when the stile width is too narrow. Please refer to Masonite Molded Door Facing Dimensional Specifications to verify the outer stile measurements or contact your Masonite Interior Door servicing plant. Textured refers to embossed wood-grain. Pre-finished white is available as textured only. Not all molded panel designs and sizes are available in all regions as stock products. Please check for special order availability. Our continuing program of product improvement makes specification, design, and product detail subject to change without notice.
